AUTHOR INDEX

A

Abboud, François M., and **John W. Eckstein.** Relationship between sodium content of arteries and arterial responsiveness to sympathetic stimulation *1025
—. See Eckstein, Wendling, and Abboud 1151
Abe, Kaoru. See Fleischer, Givens, Abe, Nicholson, and Liddle *1047
Abildskov, J. A. See Millar, Eich, Smulyan, and Abildskov *1075
Abramson, Ruth G. See Porush and Abramson *1087
—. See Stein, Abramson, and Levitt *1100
—. See Stein, Abramson, Bercovitch, and Levitt 1720
Adler, Sheldon, Arlene Roy, and **Arnold S. Relman.** Intracellular acid-base regulation. I. The response of muscle cells to changes in CO_2 tension or extracellular bicarbonate concentration 8
—, **Arlene Roy,** and **Arnold S. Relman.** Intracellular acid-base regulation. II. The interaction between CO_2 tension and extracellular bicarbonate in the determination of muscle cell pH 21
Ahmann, Thomas M. See White and Ahmann *1111
Ahmed, Abdul B. Jalal. See Dingman, Gonzalez-Auvert, Ahmed, and Akimura *1041
Ahrens, E. H., Jr. See Spritz, Ahrens, and Grundy 1482
Airo, Romano. See Kaufman, Airo, Pollack, and Crosby *1063
Aisenberg, Alan C. Studies of lymphocyte transfer reactions in Hodgkin's disease 555
Akimura, Akira. See Dingman, Gonzalez-Auvert, Ahmed, and Akimura *1041
Albright, Charles D., and **Stuart Bondurant.** Some effects of respiratory frequency on pulmonary mechanics 1362
Alexander, Carl S. The effect of 3′,5′-cyclic AMP and other nucleotides on urine flow and hemodynamics in the rat *1025
Alexander, Diane. See Zakim, Alexander, and Sleisenger *1115
Alp, Haluk, and **Lillian Recant.** Studies of the insulin-inhibitory effect of human albumin fractions 870
Alper, Chester A., Alan S. Levin, and **Fred S. Rosen.** The metabolism of an I^{131}-labeled human complement component *1025
—, **John H. Peters, Alan G. Birtch,** and **Frank H. Gardner.** Haptoglobin synthesis. I. *In vivo* studies of the production of haptoglobin, fibrinogen, and γ-globulin by the canine liver 574
Alter, Harvey J. See Blumberg and Alter *1029
Ames, Richard P., Abraham J. Borkowski, Alfred M. Sicinski, and **John H. Laragh.** Prolonged infusions of angiotensin II and norepinephrine and blood pressure, electrolyte balance, and aldosterone and cortisol secretion in normal man and in cirrhosis with ascites 1171
Amos, D. B., P. J. Nicks, N. Peacocke, and **H. O. Sieker.** An evaluation of the normal lymphocyte transfer test in man 219
Anbar, M., S. Guttman, and **J. A. Stein.** The determination of the rate of deiodination of radioactive thyroxine in human subjects 1986
Andres, Reubin. See Baltzan, Andres, Cader, and Zierler 80
Andriole, Vincent T., and **Franklin H. Epstein.** Prevention of pyelonephritis by water diuresis: evidence for the role of medullary hypertonicity in promoting renal infection 73
Aoyagi, T. See Summerskill, Aoyagi, Evans, and Engstrom *1103
Appel, Stanley H. *In vitro* inhibition of brain protein synthesis: an approach to the molecular pathology of maple syrup urine disease and phenylketonuria *1026
Arias, Irwin M., Leslie Bernstein, Robert Toffler, and **Judith Ben-Ezzer.** Black liver disease in Corriedale sheep: metabolism of tritiated epinephrine and incorporation of isotope into the hepatic pigment *in vivo* *1026
—, **Sonia Wolfson, Jerold F. Lucey,** and **R. James McKay, Jr.** Transient familial neonatal hyperbilirubinemia 1442
Arimura, G. K. See Yunis, Arimura, Lutcher, Blasquez, and Halloran *1114
Arky, Ronald A. See Herbert, Lau, Gottlieb, Arky, and Bleicher *1059
—. See Jones and Arky *1062
Arnaud, Claude D., Hans A. Kneubuhler, Virginia L. Seiling, Bruce K. Wightman, and **Norman H. Engbring.** Responses of the normal human to infusions of plasma from patients with Graves' disease 1287
Ashenbrucker, H. See Athens, Haab, Raab, Boggs, Ashenbrucker, Cartwright, and Wintrobe 778
—. See Athens, Raab, Haab, Boggs, Ashenbrucker, Cartwright, and Wintrobe 765
Asher, John D. See Nichols, Griffith, and Asher *1080
Asofsky, R. See Fahey, Barth, Asofsky, and Rowe *1045
Athens, J. W., O. P. Haab, S. O. Raab, D. R. Boggs, H. Ashenbrucker, G. E. Cartwright, and **M. M. Wintrobe.** Leukokinetic studies. XI. Blood granulocyte kinetics in polycythemia vera, infection, and myelofibrosis 778
—, **S. O. Raab, O. P. Haab, D. R. Boggs, H. Ashenbrucker, G. E. Cartwright,** and **M. M. Wintrobe.** Leukokinetic studies. X. Blood granulocyte kinetics in chronic myelocytic leukemia 765
—. See Boggs, Athens, Cartwright, and Wintrobe 643
Austen, W. G. See Hedley-Whyte, Corning, Laver, Austen, and Bendixen 406
Avery, Mary Ellen. See Said, Avery, Davis, Banerjee, and El-Gohary 458
Avigan, Joel, and **Daniel Steinberg.** Sterol and bile acid excretion in man and the effects of dietary fat 1845
—. See Lindstedt, Avigan, Goodman, Sjövall, and Steinberg 1754

* Abstract.

Avioli, Louis V., Joseph E. McDonald, and **Sook Won Lee.** The influence of age on the intestinal absorption of ^{47}Ca in women and its relation to ^{47}Ca absorption in postmenopausal osteoporosis 1960
—, **Joseph E. McDonald, Judith Lund,** and **Hector DeLuca.** The fate of intravenously administered tritiated vitamin D_3 in normal subjects and in patients with sarcoidosis *1026
—, **Joseph E. McDonald, Richard A. Singer,** and **Philip H. Henneman.** A new oral isotopic test of calcium absorption 128
Aynedjian, Hagop S. See BANK and AYNEDJIAN 681
—. See BANK and AYNEDJIAN *1027
—. See GLABMAN, AYNEDJIAN, and BANK *1050
—. See GLABMAN, AYNEDJIAN, and BANK 1410
Ayvazian, John H., and **Solomon Skupp.** The study of purine utilization and excretion in a xanthinuric man 1248

B

Bailey, Elizabeth Jane. See LERNER and BAILEY *1066
Bakemeier, R. F. See LEDDY, BAKEMEIER, and VAUGHAN *1066
Baldwin, David S. See LOWENSTEIN, STEINMETZ, EFFROS, GOMEZ, CHASIS, and BALDWIN *1071
Baltzan, Marcel A., Reubin Andres, Gordon Cader, and **Kenneth L. Zierler.** Effects of epinephrine on forearm blood flow and metabolism in man 80
Baluda, Maryellen C. See BEUTLER, BALUDA, STURGEON, and DAY *1028
Banerjee, Chandra M. See SAID, AVERY, DAVIS, BANERJEE, and EL-GOHARY 458
Bangham, A. D. See WEISSMANN, SESSA, STANDISH, and BANGHAM *1109
Bank, Arthur. See BURKA, BANK, and MARKS *1031
Bank, Norman, and **Hagop S. Aynedjian.** Individual nephron function in experimental pyelonephritis *1027
—, and **Hagop S. Aynedjian.** On the mechanism of hyposthenuria in hypercalcemia 681
—. See GLABMAN, AYNEDJIAN, and BANK *1050
—. See GLABMAN, AYNEDJIAN, and BANK 1410
Barakat, Russell M., and **Sidney H. Ingbar.** The effect of acute iodide depletion on thyroid function in man 1117
Barcena, Carlos. See GOLDSMITH, BARCENA, JOHNSON, and SCHREINER *1052
Barnett, Eugene V. See SAMLOFF and BARNETT *1094
Barrett, Peter V. D., and **Nathaniel I. Berlin.** Bilirubin turnover: studies in normal and pathologic states utilizing bilirubin-C^{14} *1027

SUBJECT INDEX

A

Absorption
iron, role of intestinal mucosa in, 543
of nonferrous metals in iron deficiency, 1470

Acatalasia
hereditary, oxidative hemolysis and erythrocyte metabolism in, 1187

Acetoacetate
production, role of carnitine in fatty acid synthesis and, 840

Acetylcholine
effects of intrarenal infusions of bradykinin and, on renal blood flow in man, 1052*

Acid balance
net, in subjects given large loads of acid or alkali, 507
production, excretion, and net balance of fixed acid in patients with renal acidosis, 495

Acid-base equilibrium
effects of hypocapnia and hypercapnia on intracellular, in man, 1073*
mechanism of bicarbonate reabsorption in proximal and distal tubules of kidney, 278

Acid-base regulation
response of extracellular hydrogen ion concentration to graded degrees of chronic hypercapnia; physiologic limits of defense of pH, 291
response of muscle cells to changes in CO_2 tension or extracellular bicarbonate concentration, 8, 21

Acid excretion
in unilateral renal disease in man, 582
production, net balance, and, of fixed acid in patients with renal acidosis, 495

Acid glycoproteins
α_1-, of normal Caucasian and Japanese individuals, 1394

Acid loads
modification of the antidiuretic effect of vasopressin by alkaline and, 754
net balance of acid in subjects given large alkaline, or, 507

Acidosis
experimental metabolic; enzymatic basis of ammonia production by dog kidney, 169

Acromegaly
excretory capacity of liver in, 1088*

ACTH
and adrenal corticosteroids, effects on erythrophagocytosis, 746
biosynthesis of adrenal steroids; effects of, 2029
dissociation of immunological and biological activities of, 1100*
experimental generation of antibodies to MSH and, 1672
in vivo studies on mechanism of action of, 1080*
studies of antibodies of, and their reactions with inactive analogues of, 1047*

Actinomycin D
effect of, upon vitamin K-induced prothrombin formation in dicumarolized rats, 1082*

Activity coefficients
NaCl and $CaCl_2$, in mixed aqueous solutions, 1076*

Adenine
mechanism of action of, in red cell preservation, 629

Adenosine diphosphate
biochemistry of human platelet clumping by, 1099*

Adenosine-3′,5′-monophosphate
cardiovascular and metabolic effects of, in man, 1068*
effects of pH and theophylline on uptake, elution, and antidiuretic action of, 1056*

Adenosine triphosphatase
family, new member of the membrane, 1039*
of human sarcoplasmic reticulum, and Ca^{++} uptake, 1425
studies on canine cardiac myosin, 1072*

Adenosine triphosphate
depletion, role of, *in vivo* on sulfobromophthalein excretion into bile, 1095*
erythrocyte membrane function in phosphate transport and production of, 1096*
metabolism in hereditary spherocytosis, 1417

Adenovirus
type 4, selective intestinal infection with, and its specific protective effect against epidemic disease, 1043*

Adipose tissue
effect of growth hormone on muscle and metabolism of, in forearm of man, 51
effect of sulfonylureas and phenformin on lipolysis in, 1101*
in vivo synthesis, interconversion, and glyceride distribution of fatty acids in rat, 1060*
long-term stability of triglyceride molecules in, 1055*, 1978
mammalian, cleavage of insulin by, 1093*

Adrenal hyperplasia
congenital, aldosterone secretion rate in, 1505
"salt-losing" congenital, impaired aldosterone production in, 957

Adrenal insufficiency
plasma antidiuretic hormone in, 1041*

Adrenal secretion
corticosteroid, responses of to hypotension and hypovolemia, 1

Adrenal steroids
biosynthesis of; effects of angiotensin II, adrenocorticotropin, and potassium, 2029
in blood, 159

Adrenergic blockade
beta, effects of, on cardiac response to maximal and submaximal exercise in man, 1745
tetany induced by hyperventilation in anxious subjects and effect of, 1105*

Adrenergic receptors
forearm venous responses to stimulation of, 1151

Adrenolytic drug
treatment of circulatory shock with, 1030*

Age
influence of, on intestinal absorption of ^{47}Ca in women and its relation to ^{47}Ca absorption in postmenopausal osteoporosis, 1960

Agglutinins
acute hemolytic anemia due to anti-i; in infectious mononucleosis, 1033*
mixed-system agglutination, 1088*

Airway resistance
correlation of, and maximal ventilatory rates in normal subjects and patients with chronic obstructive pulmonary disease, 1090*

Albumin
human serum, association of fever and antibody response in rabbits immunized with, 1077*
human serum, effects of long-term storage on, 1561
insulin-inhibitory effect of, 870
polarographic characteristics of, 1087*

Alcohol
effects of, on host defenses, 1030*
effects of prolonged ethanol intake; production of fatty liver despite adequate diets, 1009

Alcohol hypoglycemia
prevention of, by insulin pretreatment, 1053*

Aldosterone
decreased plasma clearance and hepatic extraction of, in patients with heart failure, 356
effect of, on salt and water absorption from the intact human colon, 801
exchange of, between plasma and thoracic duct lymph in man, 1113*

* Abstract.

impaired production in "salt-losing" congenital adrenal hyperplasia, 957
inhibition of biosynthesis of, by puromycin, 1032*
metabolism of, in several experimental situations with altered secretion of, 1433
secretion in congenital adrenal hyperplasia, 1058*
secretion of, extrarenal regulation of, in primary aldosteronism, 1074*
secretion of, prolonged infusions of angiotensin II and norepinephrine and blood pressure, electrolyte balance, and cortisol secretion in normal man and in cirrhosis with ascites, 1171
secretion of, stimulation and suppression testing of, in man, 1065*
secretion rate in congenital adrenal hyperplasia, 1505
uptake, distribution, and disappearance of intravenously administered *d*-aldosterone-1,2,-H^3 in heart, arteries, and kidney, 1060*

Aldosteronism
primary, extrarenal regulation of aldosterone secretion in, 1074*

Alkaline loads
modification of the antidiuretic effect of vasopressin by acid and, 754
net balance of acid in subjects given large loads of acid or, 507

Alkalosis
hypokalemic, role of chloride in, in the rat, 326

Alveolar lining lipids
human, and cells obtained *in vivo*, 1047*

Amino acids
defective intestinal transport of dibasic, and cystine, 442
effect of vitamin deficiencies on intestinal transport of, 1090*
transport of neutral and dibasic, by human leukocytes; absence of defect in cystinuria, 1382

***p*-Aminosalicylic acid**
partial purification and properties of isoniazid transacetylase in human liver; relationship to, 1992

Ammonia
enzymatic basis of production by dog kidney, 169
metabolic implications of renal gluconeogenesis in rate control of synthesis of, 1049*
micropuncture study of renal excretion of, by the dog, 1091*
urinary excretion; exaltation and abatement of, 1089*

Ammonium
urinary excretion in primary gout, 1474
urinary, N^{15} tracer studies on the origin of, in the acidotic dog, 731

Ammonium chloride acidosis
net balance of acid in subjects given large loads of acid or alkali, 507

Amphetamine
adipokinetic action of, 1086*

Amphotericin B
effect of, on permeability of toad bladder, 1328

Anaphylaxis
passive transfer of immediate type hypersensitivity from man to other primates, 140

Androgens
mechanism of action of, on erythropoiesis, 1057*
plasma ketosteroids and testosterone in man; study of the pituitary-testicular axis, 657

Androsterone sulfate
binding of, by human plasma protein, 1234

Anemia
refractory sideroblastic, heme and porphyrin synthesis in, 1106*

Angiocardiograms
calculation of left ventricular volume from single plane (A-P), 1094*

Angiotensin
biosynthesis of adrenal steroids; effects of, 2029
hemodynamic effects of norepinephrine and; studies in clinical shock and hypotension, 1494
prolonged infusions of, and norepinephrine and blood pressure, electrolyte balance, and aldosterone and cortisol secretion in normal man and in cirrhosis with ascites, 1171
quantitative immunochemical determination of, 1083*
relationship of renal vascular activity of, to autonomic nervous system, 1911

Antibodies
experimental generation of, to α-melanocyte stimulating hormone and adrenocorticotropic hormone, 1672
in urine, characterization of, 703
incomplete anti-Rh, mechanism of direct agglutination induced by mercaptoethanol, 1352
precipitating, against serum protein ("Australia antigen") in serum of transfused hemophilia patients, 1029*
synthesis of prenatal, as measured in healthy human newborn, 1044*

Antibody response
association of fever and, in rabbits immunized with human serum albumin, 1077*

Anticoagulant
circulating, in γ_{1A}-multiple myeloma; modification by penicillin, 1866
role of proaccelerin in human blood coagulation; evidence that proaccelerin is converted to a prothrombin-converting principle by activated Stuart factor; with notes on anticoagulant action of soybean trypsin inhibitor, protamine sulfate, and hexadimethrine bromide, 302

Antidiuresis
modification of effect of vasopressin by acid and alkaline loads, 754

Antidiuretic hormones
comparative potency of lysine-8- and arginine-8-vasopressin in humans, 1075*
plasma, in adrenal insufficiency, 1041*

Antigens
specific antigenic similarity between malignant adult and normal fetal tissues of the human digestive system, 1051*

Antihemophilic factor
alterations in activity of, induced by brain stimulation, 1057*

Antinuclear factors
slowly sedimenting mercaptoethanol-resistant, related antigenically to M immunoglobulins in patients with systemic lupus erythematosus, 62

Anuria
development of, renal micropuncture study of, in rat with mercury-induced acute renal failure, 449

Aplasia
Dilantin-induced erythroid, biochemical lesions in, 1114*

Arterial oxygen saturation
and low pulmonary diffusing capacity, 789

Arterial responsiveness
relationship between sodium content of arteries and, to sympathetic stimulation, 1025*

Asthma
passive transfer of immediate type hypersensitivity from man to other primates, 140

Atelectasis
pulmonary surface activity in induced pulmonary edema, 458

Atrial pressures
relationship of renal excretion of sodium and water to, and cardiac output, 1100*

Atrioventricular conduction
determinants of the duration of the refractory period of the atrioventricular nodal system in man, 883
interrelationship of potassium and vagal action on the sinoatrial pacemaker and on, 399

Atrioventricular nodal system
determinants of the duration of the refractory period of the, in man, 883

Atropine
mechanism of certain abnormalities of the circulation to the limbs in thyrotoxicosis, 947

Autonomic innervation
function of vascular smooth muscle and its sympathetic innervation in newborn dog, 241
Autonomic nervous system
relationship of renal vascular activity of angiotensin II to, 1911

B

Bacterial antagonism
experimental studies of, 1074*
Bacterial endotoxin
quantitative studies of febrile tolerance and levels of specific antibody evoked by, 920
Bacterial interference
mechanism of, 1091*
Bacterial variants
significance of, in urine of patients with chronic bacteriuria, 1945
Bacteriuria
chronic, significance of bacterial variants in urine of patients with, 1945
Bicarbonate
-carbon dioxide, fundamental determinant of activities in biological systems, 1091*
mechanism of reabsorption in proximal and distal tubules of kidney, 278
Bile
human gallbladder, macromolecular complexes and bilirubin binding in, 1043*
intestinal absorption of pigments, 722
Bile acids
biliary, effect of dietary fat on turnover of cholic acid and on composition of, in man, 1754
cholesterol synthesis by gastrointestinal tract; localization and mechanisms of control, 1311
excretion of sterol and, in man and effects of dietary fat, 1845
formation of, from 4-C^{14}-vitamin D_3 in rat, 1027*
Bile salts
intestinal absorption of, in man and rabbits with ileal bypass, 1033*
Biliary evacuation
component phases of human, 1044*
Biliary excretion
metabolic fate of estriol and its glucuronide, 694
Bilirubin
early appearing, evidence for two components, 31
macromolecular complexes and binding of, in human gallbladder bile, 1043*
plasma conjugated; dialyzability, protein binding, and renal excretion of, 666
turnover studies in normal and pathologic states utilizing bilirubin-C^{14}, 1027*
Bilirubin encephalopathy
experimental models in newborn and adult animals, 1040*
Black liver disease
in Corriedale sheep; metabolism of tritiated epinephrine and incorporation of isotope into hepatic pigment *in vivo*, 1026*
Bladder
possession of an intrinsic antibacterial defense mechanism, 1084*
Blind-loop syndrome
steatorrhea in, studies on pathogenesis of, 1815
Blister fluid
occurrence of lysosomal enzymes in, 1098*
Blood
human and canine vessels, studies of protein and lipoprotein synthesis in, 1035*
hypercoagulability induced by intravascular hemolysis, 1089*
Blood carboxyhemoglobin
concentration of, considerations of physiological variables that determine, in man, 1899
Blood flow
forearm, effects of epinephrine on, and metabolism in man, 80
pulmonary arterial pressure at high pulmonary flow, 2040
pulmonary, diffusing capacity and, at hyperbaric pressures, 1591
pulmonary, exercise limitation following extensive pulmonary resection, 1514
Blood group antibody
anti-i, red cell membrane alteration associated with "marrow stress," 1730
Blood group antigens
alteration of, in leukemic lymphocytes, 1582
Blood pressure
prolonged infusions of angiotensin II and norepinephrine and electrolyte balance, aldosterone and cortisol secretion, and, in normal man and in cirrhosis with ascites, 1171
pulsus paradoxus, 1882
Blood volume
expansion and changes in pulmonary circulation, 366
total, of forearm in relationship to venous pressure-volume curve, 1114*
Body composition
in severe infantile malnutrition, 417
Bone
mobilization and parathyroid hormone, *in vitro*, 1104*
resorption in tissue culture, factors influencing response to parathyroid hormone, 103
stimulation of turnover by oral phosphate in vitamin D-resistant osteomalacia, 1078*
Bone metabolism
metabolic studies of changes of hyperparathyroid human bone *in vitro*, 1795
metabolic studies of normal human bone *in vitro*, 1788
Bradykinin
effects of intrarenal infusions of, and acetylcholine on renal blood flow in man, 1052*
Brain protein synthesis
in vitro inhibition of, an approach to molecular pathology of maple syrup urine disease and phenylketonuria, 1026*
Breast cancer
male, abnormal estrogen metabolism in, 1116*
Breast tumor cells
replication pattern and time of experimentally induced, 1060*
Bronchial pressure
measurements in emphysema and bronchitis, 897
Bronchitis
bronchial pressure measurements in emphysema and, 897

C

Calcitonin
activity in hereditary osteopetrosis, 1111*
Calcium
absorption, influence of age on, and relation to, in postmenopausal osteoporosis, 1960
absorption, new isotopic test of, 128
composition of erythrocytes in vitamin B_{12} deficiency and iron deficiency, 1225
disorders of metabolism in uremia, 1053*
effect on kidney, 681
effects of serum level and parathyroid extracts on excretion of phosphate and, in hypoparathyroid patients, 942
in red blood cells, spectrochemical analysis of, 379
kinetics during high calcium intake in osteoporosis, 1547
tubular transport of, effects of cardiac glycosides on, 1132
uptake of, and ATPase of human sarcoplasmic reticulum, 1425
Calcium chloride
activity coefficients of NaCl and, in mixed aqueous solutions, 1076*
Capillary volume
"pressure-volume relationship" of normal pulmonary capillary bed, 1261
Carbohydrate metabolism
erythrocyte, effects of serum factor on, 1032*
Carbohydrate tolerance
abnormalities in, associated with elevated plasma nonesterified fatty acids, 2010
Carbon dioxide
-bicarbonate, fundamental determinant of activities in biological systems, 1091*
stabilizing effects of oxygen and, in periodic breathing, 1065*

Carbon dioxide tension
mechanism of bicarbonate reabsorption in proximal and distal tubules of kidney, 278
Carbon monoxide
considerations of physiological variables that determine blood carboxyhemoglobin concentration in man, 1899
placental diffusion studies using, in sheep, 1070*
Carboxyhemoglobin
considerations of physiological variables that determine concentration of in blood, 1899
Cardiac conduction
determinants of the duration of the refractory period of the atrioventricular nodal system in man, 883
Cardiac glycosides
effects of, on renal tubular transport of calcium, magnesium, inorganic phosphate, and glucose in dog, 1132
Cardiac output
effects of beta-adrenergic blockade on cardiac response to maximal and submaximal exercise in man, 1745
relationship of renal excretion of sodium and water to atrial pressures and, 1100*
studies in clinical shock and hypotension, 1494
Cardiac performance
specialized conduction system and, 1075*
Carnitine
role in acetoacetate production and fatty acid synthesis, 840
β-Carotene
absorption and metabolism of radioactive, and vitamin A in man, 1054*
Carotid artery
effect of acute increase in intracranial pressure on blood flow in, of man, 1343
Cartilage
effects of aging on composition of, 1647
proteinpolysaccharides from human articular and costal, 1647
Catecholamine
metabolites, excretion of by normal children and those with familial dysautonomia, 1049*
Cation binding
effect of ouabain infusion on, by particulate fractions of renal cortex, 1079*
Caval ligation
effect of, on response of proximal tubular sodium reabsorption to saline infusion, 1035*
Celiac disease
adult, immunofluorescent studies in, 475
Cell culture
studies on hybridization of mammalian cells in, 1070*
Cell pH
response of muscle cells to changes in CO_2 tension or extracellular bicarbonate concentration, 8, 21
Cerebral blood flow
effect of acute increase in intracranial pressure on, in internal carotid artery of man, 1343
Ceruloplasmin
copper^{67} labeled, quantitation of gastrointestinal protein loss with, 1107*
polarographic characteristics of, 1087*
Chloride
electrical nature of coupled and uncoupled transport of sodium and, in reptilian bladder, 1054*
renal tubular reabsorption of, compared to iodide, 1371
role of, in hypokalemic alkalosis in the rat, 326
Chlorophenoxyisobutyric acid
effect of, and ethinyl estradiol on cholesterol turnover, 891
Choledocholithiasis
in rats, lithocholic acid-induced, 1084*
Cholesterol
biosynthesis in circulating blood cells, 1110*
biosynthesis of, effect of exogenous cholesterol on, in familial hypercholesteremia, 1084*
dietary, studies on influence of, on cholesterol metabolism in isotopic steady state in man, 1805
effect of chlorophenoxyisobutyric acid and ethinyl estradiol on turnover of, 891
effect of fatty acid saturation on distribution of cholesterol moiety of very low density lipoproteins, 339
intestinal absorption and esterification of ^{14}C-labeled fatty acids in man, 1766
plasma, sterol balance in man as concentrations are altered by exchanges of dietary fats, 1482
synthesis by gastrointestinal tract; localization and mechanisms of control, 1311
synthesis, intestinal; localization and control, 1040*
Cholesterol anemia
pathophysiology of, in rabbits, 1059*
Cholesterol metabolism
sterol and bile acid excretion in man and effects of dietary fat, 1845
studies on influence of dietary cholesterol on, in isotopic steady state in man, 1805
studies on mechanism of action of unsaturated fats on, in rabbit, 1834
Chondroitinsulfate
polymerization of cartilage, 1029*
Chondromucoprotein
antigenic determinants of bovine, human, and porcine, 1095*
Chylomicrons
intestinal absorption and esterification of ^{14}C-labeled fatty acids in man, 1766
kinetics of triglyceride turnover of very low density lipoproteins of human plasma, 1826
lymph, composition and structure of, in dog, rat, and man, 1610
mechanism of formation of secondary fat particles from lymph, 1028*
preservation of dietary triglycerides in the secondary particles of alimentary lipemia, 1451
Circulation
human cross, physiologic observations of, 1045*
mechanism of certain abnormalities of, to the limbs in thyrotoxicosis, 947
Circulatory shock
treatment of, with adrenolytic (vasodilator) drug, 1030*
Coagulation
role of platelet fibrinogen in the reactions of platelets to thrombin, 809
role of prc ccelerin in human blood, 302
Coarctation
of aorta, hemodynamic studies in adult dogs with, artificially produced *in utero*,, 1061*
Cobalt
absorption of, in iron deficiency, 1470
Colicin
effect on bactericidal power of blood, 849
Collagen
clinical significance of a hydroxyproline-containing protein in human plasma, 914
Collecting tubules
effect of vasopressin on water permeability of isolated perfused, 1055*
Colloid goiter
pathogenesis of, 1056*
Colon
effect of aldosterone on salt and water absorption from, 801
Complement
components, fixation of, to autoantibody eluted from human RBC, 1066*
human, pH optima in immune hemolysis: a comparison between guinea pig and, 149
immunofluorescent localization of immunoglobulins, fibrinogen, and, in human diseases, 1657, 1665
initiation and enhancement of human red cell lysis by activators of the first component of, and by first component esterase; studies using normal red cells and red cells from patients with paroxysmal nocturnal hemoglobinuria, 518
metabolism of an I^{131}-labeled human component, 1025*

third component, hemolysis of red cells from patients with paroxysmal nocturnal hemoglobinuria by isolated subcomponents of, 1114*
third component, hemolysis of red cells from patients with paroxysmal nocturnal hemoglobinuria by partially purified subcomponents of, 1534

Compliance
regional lung mechanics in pulmonary disease, 906

Conduction system
specialized, and cardiac performance, 1075*

Congestive heart failure
decreased plasma clearance and hepatic extraction of aldosterone in patients with, 356

Connective tissue diseases
muscle- and nuclear-binding serum globulin in patients with, 1079*

Contractility
contractile properties of human heart muscle; studies on myocardial mechanics of surgically excised papillary muscles, 966
myocardial force-velocity relations studied in intact unanesthetized man, 978

Contraction
velocity of, major determinant of myocardial oxygen consumption, 1099*

Copper
composition of erythrocytes in vitamin B_{12} deficiency and iron deficiency, 1225
in red blood cells, spectrochemical analysis of, 379

Coronary artery
lesions, relationships between, and myocardial ischemia in man, 1044*

Coronary heart disease
metabolic studies in young men with, 1090*

Corticosteroids
adrenal, and ACTH, effects on erythrophagocytosis, 746

Cortisol
effects of physiological concentrations of, on sodium transport in erythrocytes, 1102*
prolonged infusions of angiotensin II and norepinephrine and blood pressure, electrolyte balance, and secretion of aldosterone and, in normal man and in cirrhosis with ascites, 1171
recovery of lymphatic system from depletion of in rat, 1038*

Cortisone
effect on plasma tyrosine concentration, 1690

Coxsackie A_{21} virus
production of illness with a small-particle aerosol of, 535
response of volunteers to inoculation with hemagglutinin-positive and hemagglutinin-negative variants of, 1125

Coxsackie B-1 virus
viruria after injection of, into renal artery of dog, 1953

Creatine
high energy phosphate compounds in myocardium during experimental congestive heart failure, 202
phosphate in normal and in failing hearts, 202

Cryoglobulinemia
immune studies in vasculitis associated with 19 S-7 S type of, 1075*

Cushing's syndrome
pregnanediol and pregnanetriol excretion in, 1073*

3′,5′-Cyclic AMP
effect of, and other nucleotides on urine flow and hemodynamics in rat, 1025*

Cystathionine
excretion of, 1049*
synthase deficiency, homocystinuria due to; metabolism of L-methionine, 1708

Cystic fibrosis
effect of medium chain triglyceride upon fat absorption and plasma lipid and depot fat of children with, of pancreas, 1924

Cystinuria
amino acid transport in leukocytes, 1382
biochemical evidence for two genetically distinct diseases, 1092*
defective intestinal transport of dibasic amino acids and cystine, 442
renal secretion of cystine in, 1038*

Cytochrome
response during repair of iron deficiency in rat, 1631

Cytomegalovirus infections
after renal homotransplantation, 1038*

D

Dehydroisoandrosterone sulfate
binding of, by human plasma protein, 1234

Denervation natriuresis
mechanism of, 93

Deoxyribonucleic acid
in serum of patients with systemic lupus erythematosus (SLE), 1104*

Dextran
mechanism of action of, 1109*

Diabetes mellitus
insulin-inhibitory effect of human albumin fractions, 870
metabolism in starvation diabetes and, 1032*
phagocytic defense against acute bacterial infection in experimental, 1041*

Diffusing capacity
and pulmonary capillary blood flow at hyperbaric pressures, 1591
of lung, maximal, for carbon monoxide, 349
"pressure-volume" relationship of normal pulmonary capillary bed, 1261
pulmonary, alterations in, and pulmonary capillary blood volume with negative pressure breathing, 1623
pulmonary, exercise limitation following extensive pulmonary resection, 1514

Digestive system
human, specific antigenic similarity between malignant adult and normal fetal tissues of, 1051*

Digitalis
analysis of inotropic effect of, and *l*-norepinephrine on left ventricle function, 1078*

Digoxin
effects of cardiac glycosides on renal tubular transport of calcium, magnesium, inorganic phosphate, and glucose in dog, 1132
tritiated, effect of renal insufficiency on the excretion of, 1080*

Dilantin
-induced erythroid aplasia, biochemical lesion in, 1114*

Diluting capacity
effect of 5/6 nephrectomy on concentrating capacity and, of residual nephrons, 603

Diuretics
site of action of furosemide and other sulfonamide diuretics in dog, 1458

Dysautonomia
excretion of catecholamine metabolites by normal children and those with familial, 1049*

E

Edema
induced pulmonary, pulmonary surface activity in, 458
pulmonary, alterations in pulmonary surface active lipids during exposure to increased oxygen tension, 1737

Electrodes
glass, *in situ* study of potassium absorption at various sites of single rat nephrons using, 1082*

Electrolyte balance
prolonged infusions of antiotensin II and norepinephrine and blood pressure, aldosterone and cortisol secretion, and, in normal man and in cirrhosis with ascites, 1171

Embolism
experimental pulmonary, ventilation-perfusion abnormalities in, 1699

Emphysema
bronchial pressure measurements in, and bronchitis, 897
pulmonary, alterations of ventilation to perfusion ratios distribution associated with successive clinical stages of, 1566

Endotoxin
E. coli, protection against lethality of, with O-antiserum, 1104*
pyrogenic refractory state during continuous intravenous infusions of bacterial, 1056*
relationship between particle size and biological activity of *E. coli* Boivin, 592
Endotoxin tolerance
effect of 6-mercaptopurine on, 1402
quantitative studies of febrile tolerance and levels of specific antibody evoked by bacterial endotoxin, 920
to induction of interferons by, and virus, 1059*
Energy metabolism
biochemical studies of, in failing human heart, 1034*
Enteric infections
studies on epidemiology of *Escherichia coli* infections, evidence for a nosocomial flora, 193
Enteritis
regional, possible association of erythrocyte glucose-6-phosphate dehydrogenase deficiency and, 1098*
Enterovirus hemagglutination
specific inhibition by sugars, 1066*
Enzyme induction
cortisone-provoked depression of plasma tyrosine concentration; relation to, in man, 1690
Epinephrine
effects of, on forearm blood flow and metabolism in man, 80
inhibition of insulin release, 1087*
metabolism of tritiated, and incorporation of isotope into hepatic pigment *in vivo*, 1026*
receptor mechanisms for metabolic and circulatory actions of, in man, 1058*
Erythrocytes
effects of physiological concentrations of cortisol on sodium transport in, 1102*
human, role of cellular hemoglobin concentration in control of volume of, in plasma, 1108*
membrane function in phosphate transport and ATP production, 1096*
phospholipids, alterations in, produced by environmental change, 1081*
radiation damage of, 1095*
Erythroid precursor cells
relationship of megakaryocytic and, 1077*
Erythrophagocytosis
effects of ACTH and adrenal corticosteroids on, 746
Erythropoiesis
erythropoietic response to minor hemorrhage in humans, 1086*
erythropoietin and erythropoiesis inhibitor activity in man, 1110*
mechanism of action of androgens on, 1057*
***Escherichia coli* infections**
epidemiology of, evidence for a nosocomial flora, 193
hospital-acquired, studies on epidemiology of, 1112*
Estradiol
the effect of chlorophenoxyisobutyric acid and ethinyl estradiol on cholesterol turnover, 891
Estrogen
abnormal metabolism in male breast cancer, 1116*
metabolic fate of estriol and its glucuronide, 694
natural, effect of, on hydroxyproline excretion in man, 1063*
origin of, in women pregnant with anencephalic fetus, 465
stimulation of growth hormone release, 1048*
Ethanol
effect on folate metabolism, 1028*
effect on hepatic secretion of triglycerides into plasma, 1115*
effects of prolonged intake; production of fatty liver despite adequate diets, 1009
-induced fatty liver on fat-free and fat-containing diets, 1069*
mechanism of the fructose effect on the metabolism of, in the human liver, 817
Etiocholanolone sulfate
binding of, by human plasma protein, 1234
Exercise
effect on low pulmonary diffusing capacity, 789
effects on myocardial force-velocity relations in intact, unanesthetized man, 2051
limitation following extensive pulmonary resection, 1514
maximal and submaximal, effects of beta-adrenergic blockade on cardiac response to, in man, 1745
maximal diffusing capacity of lung for carbon monoxide, 349
passive, effect on pulmonary capillary blood volume, 271
pulmonary diffusion in; "pressure-volume relationship" of normal pulmonary capillary bed, 1261
role of sympathetic nervous system in lipid mobilization during, 1105*
Expiratory airway collapse
study of, in excised human lungs, 1103*
Extracellular volume expansion
renal response to, studies on mechanism of natriuresis accompanying increased renal blood flow and its role in, 1857

F

Fat
characterization of fat particles in plasma of hyperlipemic subjects maintained on fat-free high carbohydrate diets, 261
dietary, effect of, on turnover of cholic acid and on composition of biliary bile acids in man, 1754
dietary, sterol and bile acid excretion in man and effects of, 1845
effect of medium chain triglyceride upon absorption of, and plasma lipid and depot fat of children with cystic fibrosis of pancreas, 1924
mechanism of formation of secondary particles from lymph chylomicrons, 1028*
saturated, intestinal absorption and esterification of ^{14}C-labeled fatty acids in man, 1766
unsaturated, intestinal absorption and esterification of ^{14}C-labeled fatty acids in man, 1766
unsaturated, studies on mechanism of action of, on cholesterol metabolism in rabbit, 1834
Fatty acids
absorption and esterification of ^{14}C-labeled, in man, 1766
effect of fatty acid saturation on distribution of cholesterol moiety of very low density lipoproteins, 339
elevated plasma nonesterified, abnormalities in carbohydrate tolerance associated with, 2010
free, effect of human growth hormone on, in forearm of man, 51
free, effects of epinephrine on forearm blood flow and metabolism in man, 80
free, liver and postheparin plasma lipolytic activity in dog and man, 860
free, plasma, effect of cold exposure on levels of, in lean and obese subjects, 1051*
glyceride, quantitative evaluation of free fatty acid and, in man, 1042*
in vivo synthesis, interconversion, and glyceride distribution of, in rat adipose tissue, 1060*
long chain, biochemical determinants of oxidation of, in newborn heart, 1113*
oxygen consumption in euthyroid and hyperthyroid states, 247
role of carnitine in acetoacetate production and synthesis of, 840
saturated, effect of dietary fat on turnover of cholic acid and on composition of biliary bile acids in man, 1754
unsaturated, effect of dietary fat on turnover of cholic acid and on composition of biliary bile acids in man, 1754
Fatty liver
effects of prolonged ethanol intake; production of, despite adequate diets, 1009

ethanol-induced, on fat-free and fat-containing diets, 1069*

Fetal lipids
human, erythrocyte and plasma, 989

Fetal myohemoglobin
human, evidence for, 1085*

Fetomaternal passage
direct evidence of, of leukocytes and platelets in man, 1040*

Fetus
anencephalic, origin of estrogen in women pregnant with, 465

Fever
association of, and antibody response in rabbits immunized with human serum albumin, 1077*
quantitative studies of febrile tolerance and levels of specific antibody evoked by bacterial endotoxin, 920

Fibrinogen
human, effect of hematoporphyrin and light on, 1098*
immunofluorescent localization of immunoglobulins, complement, and, in human diseases, 1657, 1665
in vivo studies of the production of haptoglobin, γ-globulin, and, by the canine liver, 574
platelet, role of in the reactions of platelets to thrombin, 809

Fibroblasts
human, effect of human leukocyte extracts on mitoses of, *in vitro*, 1046*

Folate metabolism
effect of ethanol on, 1028*

Folic acid deficiency
as a cause of uterine hemorrhage in pregnancy, 1102*

Force-velocity relations
myocardial, effects of exercise on, in intact unanesthetized man, 2051

Forearm muscle
uptake of palmitic acid by, measured simultaneously with palmitic output from forearm adipose tissue, 1064*

Free water clearance
maximal, demonstration of, in hydrated dog, 1100*

Frog skin
nature of adrenergic influence on sodium transport in, 1108*

Fructose
-induced disruption of renal acidification in patients with hereditary intolerance for, 1076*
mechanism of the effect of, on the ethanol metabolism of the human liver, 817
metabolism, sugar transport, and, in human intestine *in vitro*, 1200

Furosemide
site of action of, and other sulfonamide diuretics in dog, 1458

G

Galactose-1-phosphate uridyl transferase
Duarte variant of, a prevalent allele of gene for galactosemia, 1028*

Galactosemia
Duarte variant of galactose-1-phosphate uridyl transferase, a prevalent allele of gene for, 1028*

Gastric mucosa
atrophic, replication of epithelial cells in, in pernicious anemia, 1070*

Gastrin
-stimulated acid secretion, relationship of histamine to, elucidated by enzymatic pathways in dog, 1102*

Gastrointestinal absorption
studies on influence of dietary cholesterol on cholesterol metabolism in isotopic steady state in man, 1805

Gastrointestinal iodide cycle
influence of, on early distribution of radioactive iodide in man, 117

Gastrointestinal protein loss
quantitation of, with copper^{67}-labeled ceruloplasmin, 1107*

Gastrointestinal tract
cholesterol synthesis by; localization and mechanisms of control, 1311

Genetics
complete pseudocholinesterase deficiency; genetic and immunologic characterization, 486

Globin
synthesis in thalassemia, 1108*

Globulins
gamma, immunoglobulin changes in disease; quantitation on basis of heavy and light polypeptide chains, 1778
gamma, *in vivo* studies of the production of haptoglobin, fibrinogen, and, by the canine liver, 574
gamma, metabolism of, in hypogammaglobulinemia, 1523
gamma, plasma, fixation of, to skin in man, 1047*
gamma, polarographic characteristics of, 1087*
immune, characterization of antibodies in human urine, 703
immune, immunoglobulin changes in disease; quantitation on basis of heavy and light polypeptide chains, 1778
muscle- and nuclear-binding serum, in patients with myasthenia gravis, muscular dystrophy, and connective tissue diseases, 1079*
myelomas deficient at pepsin site, a buried determinant of human IgG, 1111*
slowly sedimenting mercaptoethanol-resistant antinuclear factors related antigenically to M immunoglobulins in patients with systemic lupus erythematosus, 62

Glomerular filtration rate
micropuncture study of effect of acute reductions in, on sodium and water reabsorption by proximal tubules of rat, 1050*, 1410

Glomeruli
isolated rat, *in vitro* protein synthesis in, 1107*

Glomerulonephritis
acute, subacute, and chronic; immunofluorescent localization of immunoglobulins, complement, and fibrinogen in, 1665

Glucose
tubular transport of, effects of cardiac glycosides on, 1132

Glucose-6-phosphatase
intestinal activity in patients with Von Gierke's disease and their parents, 1240

Glucose-6-phosphate dehydrogenase
erythrocyte, possible association of deficiency of, and regional enteritis, 1098*

Glucose tolerance
abnormalities in carbohydrate tolerance associated with elevated plasma nonesterified fatty acids, 2010

Glucose uptake
effects of epinephrine on forearm blood flow and metabolism in man, 80

Glutamic acid
enzymatic synthesis of, and glutamines, 731

Glutamines
enzymatic synthesis of glutamic acid and, 731

Glutathione
importance of conjugation with, for BSP transfer from blood to bile, 1214

Glycerides
dietary, preservation of, in secondary particles of alimentary lipemia, 1451

Glycogen storage disease
studies in; intestinal glucose-6-phosphatase activity in patients with Von Gierke's disease and their parents, 1240

Glycoproteins
α_1-acid, of normal Caucasian and Japanese individuals, 1394

Gout
primary, ammonium excretion in, 1474

Graft rejection
altered, immunosuppression and, produced by antilymphocyte serum, 1079*

Gram-negative infections
influence of bacteriocins on resistance to, 849

studies on epidemiology of *Escherichia coli* infections; evidence for a nosocomial flora, 193
Granulocyte kinetics
in chronic myelocytic leukemia, 765
in polycythemia vera, infection, and myelofibrosis, 778
Granulopoiesis
experimental evaluation of a model of, 643
Growth hormone
bovine, metabolic effects of, in man, digested with trypsin, 1099*
effect of, on muscle and adipose tissue metabolism in forearm of man, 51
estrogen stimulation of release of, 1048*

H

Haptoglobin
in vivo studies of the production of fibrinogen, γ-globulin, and, by the canine liver, 574
Hay fever
passive transfer of immediate type hypersensitivity from man to other primates, 140
Heart
effects of exercise on myocardial force-velocity relations in intact unanesthetized man, 2051
failing human, biochemical studies of energy metabolism in, 1034*
newborn, lipid metabolism in, 1639
output, pulsus paradoxus, 1882
Heart failure
experimental, high energy phosphate compounds in myocardium during, 202
Heart muscle
human, contractile properties of; studies on myocardial mechanics of surgically excised papillary muscles, 966
load, work, and velocity of muscle shortening of the left ventricle in normal and abnormal human hearts, 1295
Heart valve
replacement or repair, pulmonary ventilation-perfusion relations after, in man, 406
Hematopoietic stem cells
transplanted, their first ten days, 1069*
Hematoporphyrin
effect of, and light on human fibrinogen, 1098*
Heme
and porphyrin synthesis in refractory sideroblastic anemia, 1106*
effect of, on hemoglobin synthesis, 1097*
Hemoglobin
asynchronous synthesis of hemoglobins A and A_2 by erythrocyte precursors, 42
cellular, role of concentration of, in the control of human erythrocyte volume in plasma, 1108*
distribution of types of, in thalassemic erythrocytes, 231
effect of heme on synthesis of, 1097*
maximal RBC and catabolism of, in dogs, 1036*
metabolism of individual C^{14}-labeled hemoglobins in patients with H-thalassemia, with observations on radiochromate binding to the hemoglobins during red cell survival, 315
Hemoglobinopathy
polycythemia associated with, 1034*
Hemolysis
blood hypercoagulability induced by intravascular, 1089*
immune, pH optima in, a comparison between guinea pig and human complement, 149
in paroxysmal nocturnal hemoglobinuria, by partially purified subcomponents of the third complement component, 1534
initiation and enhancement of human red cell lysis by activators of the first component of complement and by first component esterase; studies using normal red cells and red cells from patients with paroxysmal nocturnal hemoglobinuria, 518
of red cells from patients with paroxysmal nocturnal hemoglobinuria by isolated subcomponents of third complement component, 1114*
studies on mechanism of, in a sheep red blood cell-guinea pig serum-cobra venom system, 1086*
Hemolytic anemia
acute, due to anti-i; frequent cold agglutinins in infectious mononucleosis, 1033*
Hemophilia
precipitating antibodies against serum protein ("Australia antigen") in serum of transfused patients with, 1029*
Hemorrhage
minor, erythropoietic response to, in humans, 1086*
Hemorrhagic hypotension
effect of, on intrarenal distribution of blood flow in normal and autotransplanted dog kidneys, 1092*
Heparin
osteoporosis, 1080*
plasma lipolytic activity in dog and man, 860
Hepatic extraction of aldosterone
decreased plasma clearance and, in patients with heart failure, 356
Hepatic lipogenesis
differential nature of defect in, in acute versus chronic insulin deprivation, 1064*
Hepatic pigment
nature of, in schistosomiasis, 1083*
Hepatitis
correlation of viral invasion with hepatic dysfunction in experimental canine, 1051*
persistent viral, mesenchymal cell proliferation in, 1066*
Hippuran
effect of mannitol on renal excretion of, independent of urine flow, 1045*
Histamine
relationship of, to gastrin-stimulated acid secretion, elucidated by enzymatic pathways in the dog, 1102*
Histidine decarboxylase
induction following portacaval shunt, 1047*
Hodgkin's disease
collagen-like plasma protein in, and experimental fever in man, 1067*
studies of lymphocyte transfer reactions in, 555
Homocystinuria
due to cystathionine synthetase deficiency, 1708
Host defenses
effects of alcohol on, 1030*
Hydrocortisone
effect of, in lethal pneumococcal infection in rabbits, 1092*
Hydrogen ion concentration
extracellular, response of, to graded degrees of chronic hypercapnia, 291
Hydronephrosis
acute and chronic, characterization of nephron function in, 1103*
Hydroxyproline
effect of natural estrogens on excretion of, in man, 1063*
Hydroxyproline-containing protein
clinical significance of, in human plasma, 914
Hyperbaric pressures
diffusing capacity and pulmonary capillary blood flow at, 1591
Hyperbilirubinemia
transient familial neonatal, 1442
Hypercalcemia
mechanism of hyposthenuria in, 681
treatment of, with small phosphate supplements, 1053*
Hypercapnia
chronic, response of extracellular hydrogen ion concentration to graded degrees of; physiologic limits of defense of pH, 291
effects of, and hypocapnia on intracellular acid-base equilibrium in man, 1073*
Hypercholesteremia
familial, effect of exogenous cholesterol on cholesterol biosynthesis in, 1084*
Hyperlipemia
differentiation of exogenous and endogenous, by paper electrophoresis, 1968
Hypernatremia
inhibition of renal tubular sodium reabsorption by, 1144

Hyperparathyroidism
metabolic studies of human bone *in vitro*, changes in, 1788
Hyperplasia
congenital adrenal, aldosterone secretion in, 1058*
Hypersensitivity
delayed, observations on hapten specificity in, 1115*
delayed, suppression of, *in vitro*, by inhibition of protein synthesis, 1039*
immediate type, passive transfer of, from man to other primates, 140
Hypersplenism
reticuloendothelial phagocytic function in patients with, and related disorders, 1085*
Hypertensive diseases
studies on presence of renal pressor material in, 1054*
Hyperventilation
tetany induced by, in anxious subjects and effect of adrenergic blockade, 1105*
Hypocapnia
effects of, and hypercapnia on intracellular acid-base equilibrium in man, 1073*
Hypocupremia
unifying concept for pathogenesis of syndrome of, in infants, 1112*
Hypogammaglobulinemia
IgG (7 S gamma globulin) metabolism in, 1523
Hypoparathyroidism
effects of serum calcium level and parathyroid extracts on phosphate and calcium excretion in, 942
Hyposthenuria
mechanism of, in hypercalcemia, 681
Hypotension
responses of adrenal corticosteroid secretion to, and hypovolemia, 1
severe postural, comparison of medium and high intakes of sodium as sole treatment for, 1105*
studies in clinical shock and, 1494
Hypovolemia
responses of adrenal corticosteroid secretion to hypotension and, 1

I

Immunity
new perspective of cellular basis of, and lymphocytic malignancies, 1037*
Immunofluorescence
immunofluorescent studies in adult celiac disease, 475
localization of immunoglobulins, complement, and fibrinogen in human diseases, 1657, 1665
Immunoglobulin
changes in disease; quantitation on basis of heavy and light polypeptide chains, 1778
Fd fragment, possible third structural unit of G immunoglobulins, 1048*
immunofluorescent localization of complement, fibrinogen, and, in human diseases, 1657, 1665
polypeptide chains of, selective deficiency of, 1045*
slowly sedimenting mercaptoethanol-resistant antinuclear factors related antigenically to M immunoglobulins in patients with systemic lupus erythematosus, 62
Immunosuppression
and altered graft rejection produced by antilymphocyte serum, 1079*
Infection
granulocyte kinetics in, 778
influence of bacteriocins on resistance to, by gram-negative bacteria, 849
Influenza
Asian, interferon study in volunteers infected with, 1062*
inactivated virus vaccine, differing effects of immunity induced by infection and, on transmission of infection, 1096*
Inhalation therapy equipment
potential role in nosocomial pulmonary infection, 831
Insulin
acute versus chronic deprivation of, differential nature of the defect in hepatic lipogenesis in, 1064*
cleavage of, by mammalian adipose tissue, 1093*
effects of, on triglyceride metabolism in man, 1062*
epinephrine inhibition of release of, 1087*
inhibition of human albumin fractions, 870
pretreatment, prevention of alcohol hypoglycemia by, 1053*
radioimmunoassay of, 1059*
study of distribution and binding of, to subcellular organelles of striated muscle, 1042*
Interferon
induced by human leukocyte cultures by viral infection and phytohemagglutinin, 1110*
study in volunteers infected with Asian influenza, 1062*
tolerance to induction of, by endotoxin and virus, 1059*
Intestinal absorption
effect of aldosterone on, from the intact human colon, 801
new oral isotopic test of calcium absorption, 128
of bile pigments, 722
of bile salts in man and rabbits with ileal bypass, 1033*
of ^{47}Ca, influence of age on, in women and its relation to ^{47}Ca absorption in postmenopausal osteoporosis, 1960
of sucrose in man; site of hydrolysis and absorption, 390
Intestinal cholesterol synthesis
localization and control, 1040*
Intestinal mucosa
role of, in iron absorption, 543
Intestinal transport
defective, of dibasic amino acids and cystine, 442
Intestine
human small, permeability characteristics of, 1935
sugar transport and fructose metabolism in, 1200
Intracranial pressure
effect of acute increase in, on blood flow in internal carotid artery of man, 1343
Intrinsic factor
identification of, and autoantibody in man by radioimmunodiffusion and radioimmunoelectrophoresis, 1094*
Iodide
acute depletion and thyroid function, 1117
influence of gastrointestinal cycle, on early distribution of radioactive, in man, 117
kinetics of thyroid, and evidence for an iodide leak, 1039*
renal tubular reabsorption of, as compared with chloride, 1371
requisite for oxidation of thiourea by thyroid tissue, 1073*
Iron absorption
role of the intestinal mucosa in, 543
Iron deficiency
absorption of nonferrous metals in, 1470
anemia, unifying concept for pathogenesis of syndrome of, in infants, 1112*
myoglobin and cytochrome response during repair of, in rat, 1631
sodium, potassium, calcium, magnesium, copper, and zinc composition of erythrocytes in vitamin B_{12} deficiency and, 1225
Isoniazid
transacetylase, partial purification and properties of, in human liver, 1992

J

Jejunal absorption
interrelation between, of sodium, glucose, and water in man, 1072*

K

Ketosis
studies in fasting, 1048*
Ketosteroids
binding of androsterone sulfate, etiocholanolone sulfate, and dehydroisoandrosterone sulfate by human plasma protein, 1234
$C_{19}O_2$ steroids and some of their precursors in blood from normal human adrenals, 159
plasma, and testosterone in man; study of the pituitary-testicular axis, 657

Kidney
acid mucopolysaccharides in, and urine of dog, 1034*
excretion of acid in disease of, 582
experimental metabolic acidosis; enzymatic basis of ammonia production by dog kidney, 169
Kwashiorkor
body composition in severe infantile malnutrition, 417

L

Lactate
blood, effect of respiratory alkalosis on blood pyruvate and, in humans, 1043*
Lactic dehydrogenase inhibitor
isolation and characterization of, of human urine, 1096*
Leukemia
acute, maturation defect of leukemic blast cells in, 1074*
acute, studies of cellular proliferation in, 1035*
alteration of blood group antigens in leukemic lymphocytes, 1582
myelocytic, granulocyte kinetics in, 765
Leukocytes
amino acid transport by; absence of defect in cystinuria, 1382
human extracts of, effect on mitoses of human fibroblasts *in vitro*, 1046*
human, ribonucleic acid biosynthesis in, 1036*
leukemic, synthesis and degradation of RNA by normal and, 1098*
Leukokinetics
experimental evaluation of a model of granulopoiesis, 643
in chronic myelocytic leukemia, 765
in polycythemia vera, infection, and myelofibrosis, 778
Lipemia
alimentary, preservation of dietary triglycerides in the secondary particles of, 1451
characterization of fat particles in plasma of hyperlipemic subjects maintained on fat-free high carbohydrate diets, 261
Lipids
dietary, sterol balance in man as plasma cholesterol concentrations are altered by exchanges of, 1482
direct effect of steroids on permeability of membranes, 1109*
metabolism in newborn heart, 1639
particles; preservation of dietary triglycerides in the secondary particles of alimentary lipemia, 1451
pulmonary surface active, alterations in, during exposure to increased oxygen tension, 1737
role of sympathetic nervous system in mobilization of, during exercise, 1105*
Lipolysis
activity in plasma, 860
effect of sulfonylureas and phenformin on, in adipose tissue, 1101*
Lipoprotein
alpha, heterogeneity of plasma high density lipoproteins, 426
characterization of fat particles in plasma of hyperlipemic subjects maintained on fat-free high carbohydrate diets, 261
isolation of, from thyroxine-labeled human serum, 1101*
lipase, liver and postheparin plasma lipolytic activity in dog and man, 860
plasma alpha$_1$, functional role for, 1068*
plasma high density, heterogeneity of, 426
preservation of dietary triglycerides in the secondary particles of alimentary lipemia, 1451
serum, low density, kinetics of triglyceride turnover of, 1826
sterol balance in man as plasma cholesterol concentrations are altered by exchanges of dietary fats, 1482
synthesis, studies of protein and, in human and canine blood vessels, 1035*
triglyceride, kinetics of plasma, in man and dog, 1046*
very low density, effect of fatty acid saturation on distribution of cholesterol moiety of, 339
Lithocholic acid
-induced choledocholithiasis in rats, 1084*
Liver
acromegalic, an excretory giant, 1088*
correlation of viral invasion with hepatic dysfunction in experimental canine hepatitis, 1051*
ethanol-induced fatty, on fat-free and fat-containing diets, 1069*
fatty, production of despite adequate diets; effects of prolonged ethanol intake, 1009
function, importance of conjugation with glutathione for BSP transfer from blood to bile, 1214
in vivo studies of the production of haptoglobin, fibrinogen, and γ-globulin by the canine, 574
mechanism of the fructose effect on the ethanol metabolism of, 817
phosphorylase deficiency, two types, excessive deactivation with brain disease and elevated urinary catecholamines (Case I), and isolated reduction of activity (Case II), 1061*
postheparin lipolytic activity in dog and man, 860
Lung
bronchial pressure measurements in emphysema and bronchitis, 897
effects of respiratory frequency on pulmonary mechanics, 1362
regional lung mechanics in pulmonary disease, 906
Lupus erythematosus
slowly sedimenting mercaptoethanol-resistant antinuclear factors related antigenically to M immunoglobulins in patients with, 62
Lymph
chylomicrons, composition and structure of, in dog, rat, and man, 1610
fat transport, intestinal absorption and esterification of ^{14}C-labeled fatty acids in man, 1766
Lymphatic system
recovery of, from cortisol depletion in rat, 1038*
Lymphocyte transfer
reactions, studies of, in Hodgkin's disease, 555
test, evaluation of, in man, 219
Lymphocytes
leukemic, alteration of blood group antigens in, 1582
Lymphocytic malignancies
new perspective of cellular basis of immunity and, 1037*
Lymphomas
malignant, in runt disease, 1097*
Lysosomal enzymes
occurrence of, in blister fluid, 1098*
Lysosomal hydrolase activity
in ischemic myocardium, 1030*

M

Magnesium
composition of erythrocytes in vitamin B_{12} deficiency and iron deficiency, 1225
in red blood cells, spectrochemical analysis of, 379
radiomagnesium kinetics in normal and uremic subjects, 1107*
tubular transport of, effects of cardiac glycosides on, 1132
Malnutrition
body composition in severe infantile, 417
Manganese
absorption of, in iron deficiency, 1470
Mannitol
differences between diuresis from saline and, in hydropenic man, 182
effect of, on intrarenal distribution of blood flow in normal and autotransplanted dog kidneys, 1092*
effect of, on renal I^{131}-Hippuran excretion independent of urine flow rate, 1045*
hypertonic, effects of, on renal sodium excretion in hydropenic man, 1087*
Maple syrup urine disease
approach to molecular pathology of, and phenylketonuria, 1026*
Marrow stress
red cell membrane alteration associated with, 1730

Mastocytosis
localized, submicroscopic features of degranulation of the human mast cell in, 1081*
Megakaryocytes
pulmonary, origin and significance of, 1063*
relationship of, and erythroid precursor cells, 1077*
Megaloblastic anemias
reticulocyte response in treated, 1031*
Melanocyte stimulating hormone
α, experimental generation of antibodies to, and to ACTH, 1672
preparation of α- and β-, for clinical use, 1067*
Menstrual cycle
renin in pregnancy and, 1112*
Mercaptoethanol
mechanism of direct agglutination of incomplete anti-Rh antibodies, 1352
6-Mercaptopurine
effect of, on endotoxin tolerance, 1402
Mercury poisoning
renal micropuncture study of development of anuria in rat with mercury-induced acute renal failure, 449
Metals
nonferrous, absorption of, in iron deficiency, 1470
Methionine
metabolism of, in homocystinuria due to cystathionine synthase deficiency, 1708
Microperfusion
regulation of proximal tubular fluid reabsorption studied by, in rat kidney, 1031*
Micropuncture
effect of acute reductions in glomerular filtration rate on sodium and water reabsorption by proximal tubules of rat, 1050*, 1410
renal, study of development of anuria in rat with mercury-induced acute renal failure, 449
studies on individual nephrons in rat with chronic pyelonephritis, 1071*
study of renal ammonia excretion by dog, 1091*
Mithramycin
metabolism of, an antitumor antibiotic, 1063*
Mitral stenosis
regional lung function in patients with, studied with xenon^{133} during air and oxygen breathing, 999
Monoamine oxidase inhibitors
false neurochemical transmitters and their relation to hypotensive action of, 1065*
Mononucleosis
infectious, frequent cold agglutinins in, 1033*
Mucopolysaccharides
acid, in kidney and urine of dog, 1034*
Multiple myeloma
circulating anticoagulant in γ_{1A}-; modification by penicillin, 1866
Muscle
striated, study of distribution and binding of insulin to subcellular organelles of, 1042*
Muscle metabolism
effect of human growth hormone on, and adipose tissue metabolism in forearm of man, 51
effects of epinephrine on forearm blood flow and metabolism in man, 80
Muscle pH
response of muscle cells to changes in CO_2 tension or extracellular bicarbonate concentration, 8, 21
Muscular dystrophy
hereditary, in mice, studies of myosin in, 615
muscle- and nuclear-binding serum globulin in patients with, 1079*
Myasthenia gravis
muscle- and nuclear-binding serum globulin in patients with, 1079*
***Mycoplasma pneumoniae* infections**
serological epidemiology, of, 1103*
Myelofibrosis
granulocyte kinetics in, 778
Myelomas
deficient at pepsin site, a buried determinant of human IgG, 1111*
Myocardial blood flow
evaluation of interrelationships between the distribution of rubidium^{86} and, 1101*
Myocardial contractility
effects of exercise on, in intact unanesthetized man, 2051
Myocardial force-velocity relations
studied in intact unanesthetized man, 978
Myocardial infarction
vulnerable period for ventricular tachycardia after, 1113*
Myocardial ischemia
relationships between coronary artery lesions and, in man, 1044*
Myocardial mechanics
the contractile properties of human heart muscle; *in vitro* studies on, of surgically excised papillary muscles, 966
Myocardial oxygen consumption
velocity of contraction, a major determinant of, 1099*
Myocardial tensions
in human left ventricle during systole, 1068*
Myocardial work
load, velocity of muscle shortening, and, of left ventricle in normal and abnormal human hearts, 1295
Myocardium
dynamics, load, work, and velocity of muscle shortening of left ventricle in normal and abnormal human hearts, 1295
high energy phosphate compounds in, during experimental congestive heart failure, 202
ischemic, lysosomal hydrolase activity in, 1030*
Myoglobin
and cytochrome response during repair of iron deficiency in rat, 1631
Myohemoglobin
human fetal, evidence for, 1085*
Myosin
studies of, in hereditary muscular dystrophy in mice, 615

N

Natriuresis
denervation, mechanism of, 93
of saline loading, changes in renal blood flow and possibly the intrarenal distribution of blood accompanying, 1042*
studies on mechanism of, accompanying increased renal blood flow and its role in renal response to extracellular volume expansion, 1857
Necrosis
idiopathic aseptic, relation of altered hemostasis to, of the femoral head, 1058*
Negative pressure breathing
alterations in pulmonary diffusing capacity and, pulmonary capillary blood volume with, 1623
Nephron
characterization of function of, in acute and chronic hydronephrosis, 1103*
individual function in experimental pyelonephritis, 1027*
Neurochemical transmitters
false, and their relation to hypotensive action of monoamine oxidase inhibitors, 1065*
heart, biochemical determinants of long chain fatty acid oxidation in, 1113*
prenatal antibody synthesis as measured in healthy human, 1044*
Nitrogen^{15} tracer studies
on the origin of urinary ammonia in the acidotic dog, 731
Norepinephrine
analysis of inotropic effect of digitalis and, on left ventricular function, 1078*
hemodynamic effects of, 1494
prolonged infusions of, and angiotensin and blood pressure, electrolyte balance, and aldosterone and cortisol secretion in normal man and in cirrhosis with ascites, 1171
Nosocomial infection
pulmonary, potential role of inhalation therapy equipment in, 831
Nucleotides
effect of 3′,5′-cyclic AMP and other, on urine flow and hemodynamics in rat, 1025*

O

Obstructive disease
pulmonary; bronchial pressure measurements in emphysema and bronchitis, 897
Osmotic diuresis
differences between saline and mannitol diuresis in hydropenic man, 182
effects of unilateral renal arterial constriction on tubular reabsorption of sodium and water during, 1720
Osteoarthritis
metabolic aspects of pathogenesis of, 1029*
Osteomalacia
vitamin D-resistant, stimulation of bone turnover by oral phosphate in, 1078*
Osteopetrosis
calcitonin activity in hereditary, 1111*
Osteoporosis
heparin, 1080*
postmenopausal, influence of age on intestinal absorption of ^{47}Ca in women and its relation to, 1960
radiocalcium kinetics during high calcium intake in, 1547
Ouabain
effect of infusion of, on cation binding by particulate fractions of renal cortex, 1079*
Oxidation-reduction
mechanism of the fructose effect on the ethanol metabolism of the human liver, 817
Oxidative hemolysis
and erythrocyte metabolism in hereditary acatalasia, 1187
Oxygen
stabilizing effects of, and carbon dioxide in periodic breathing, 1065*
Oxygen affinity
of SS blood, a possible mechanism for decreased, 1031*
Oxygen consumption
maximal, and low pulmonary diffusing capacity, 789
relationship between free fatty acid turnover and total body, in euthyroid and hyperthyroid states, 247
Oxygen depletion
prolonged diving in the seal, a model for study of, 1078*
Oxygen tension
increased, alterations in pulmonary surface active lipids during exposure to, 1737
Oxypurines
renal excretion of, 623

P

Palmitic acid
uptake of, by forearm muscle measured simultaneously with palmitic output from forearm adipose tissue, 1064*
Paper electrophoresis
differentiation of exogenous and endogenous hyperlipemia by, 1968
Parathyroid disease
metabolic studies of changes in hyperparathyroid human bone *in vitro*, 1788
Parathyroid hormone
actions of, in vitamin D-deficient dog, 2003
and bone mobilization *in vitro*, 1104*
bone resorption in tissue culture, factors influencing response to, 103
effects of serum calcium level and parathyroid extracts on phosphate and calcium excretion in hypoparathyroid patients, 942
Parietal cell antibody
studies of, in pernicious anemia, 2021
Paroxysmal nocturnal hemoglobinuria
hemolysis in, by partially purified subcomponents of the third complement component, 1534
hemolysis of red cells from patients with, by isolated subcomponents of the third complement component, 1114*
initiation and enhancement of human red cell lysis by activators of the first component of complement and by first component esterase; studies using normal red cells and red cells from patients with, 518
Penicillin
immune responses to, and penicillin allergy, in man, 1067*
modification of a circulating anticoagulant in multiple myeloma by, 1866
Perfusion
of lung, regional lung function in patients with mitral stenosis studied with xenon^{133} during air and oxygen breathing, 999
Periodic breathing
stabilizing effects of oxygen and carbon dioxide in, 1065*
Peritoneal dialysis
successful long-term, in terminal renal failure, 1029*
Permeability
effect of amphotericin B on, of toad bladder, 1328
Pernicious anemia
replication of epithelial cells in atrophic gastric mucosa in, 1070*
studies of parietal cell antibody in, 2021
pH optima
in immune hemolysis, a comparison between guinea pig and human complement, 149
Phagocytic defense
against acute bacterial infection in experimental diabetes mellitus, 1041*
Phagocytosis
effects of ACTH and adrenal corticosteroids on, 746
Phenformin
effect of sulfonylureas and, on lipolysis in adipose tissue, 1101*
Phenylketonuria
approach to molecular pathology of maple syrup urine disease and, 1026*
Phosphate
in myocardium during experimental congestive heart failure; purine and pyrimidine nucleotides, creatine, and creatine phosphate in normal and failing hearts, 202
oral, stimulation of bone turnover by, in vitamin D-resistant osteomalacia, 1078*
treatment of hypercalcemia with small supplements of, 1053*
Phosphate excretion
effects of serum calcium level and parathyroid extracts on calcium excretion and, in hypoparathyroid patients, 942
Phosphate transport
erythrocyte membrane function in, and ATP production, 1096*
tubular, effects of cardiac glycosides on, 1132
Phosphatide
concomitant increase of membrane metabolism of, and sodium transport in hereditary spherocytosis, 1062*
Phospholipids
erythrocyte, alterations in, produced by environmental change, 1081*
Phosphorylase
liver deficiency of, two types, 1061*
Phytohemagglutinin
two different interferons induced in human leukocyte cultures by viral infection and, 1110*
Pituitary-testicular axis
plasma ketosteroids and testosterone in man, 657
Placental diffusion
studies using carbon monoxide in sheep, 1070*
Plasma lipids
human fetal erythrocyte and, 989
Plasma proteins
clinical significance of a hydroxyproline-containing protein in human plasma, 914
Platelet aggregation
human, biochemistry of, by adenosine diphosphate, 1099*
platelet glycolysis, platelet phosphorus turnover, and, 1093*
Platelet glycolysis
platelet phosphorus turnover, platelet aggregation, and, 1093*
Platelet phosphorus turnover
platelet glycolysis, platelet aggregation, and, 1093*

Platelets
canine and human, use of selenomethionine as a label for, 1036*
role of platelet fibrinogen in the reactions of, to thrombin, 809
Pleuropneumonia-like organisms
phagocytosis of, by mononuclear cells, 1115*
Pneumococcal infection
lethal, effect of hydrocortisone in, in rabbits, 1092*
Polarographic characteristics
of albumin, gamma globulin, ceruloplasmin, and transferrin, 1087*
Polycythemia
associated with a hemoglobinopathy, 1034*
vera, granulocyte kinetics in, 778
Polyinosinic acid
initiation and enhancement of human red cell lysis by activators of the first component of complement and by first component esterase; studies using normal red cells and red cells from patients with paroxysmal nocturnal hemoglobinuria, 518
Polysaccharides
from human articular and costal cartilage, 1647
Porphyria
acute, hypothesis to explain metabolic defect in, 1072*
acute intermittent, first "overproduction disease" localized to a specific enzyme, 1085*
Porphyrin
synthesis of heme and, in refractory sideroblastic anemia, 1106*
Portacaval shunt
histidine decarboxylase induction following, 1047*
Potassium
composition of erythrocytes in vitamin B_{12} deficiency and iron deficiency, 1225
in red blood cells, spectrochemical analysis of, 379
interrelationship of, and vagal action on the sinoatrial pacemaker and on atrioventricular conduction, 399
Potassium absorption
study of, at various sites of single rat nephrons using glass electrodes *in situ*, 1082*
Potassium depletion
role of chloride in hypokalemic alkalosis in rat, 326
Potassium transfer
myocardial, relation of ventricular arrhythmias during coronary thrombosis to, 1089*
Prealbumin
preparation of I^{131}-labeled, and its metabolism in normal and sick patients, 1600
thyroid binding, new method for measuring free thyroid hormone in human serum and an analysis of factors that influence its concentration, 1679
Pregnancy
origin of estrogen in women pregnant with an anencephalic fetus, 465
renin in, and the menstrual cycle, 1112*
Pregnanediol
and pregnanetriol excretion in Cushing's syndrome, 1073*
Pressure
intracranial, effect of acute increase in, on blood flow in internal carotid artery of man, 1343
Pressure-volume curve
venous, total blood volume of forearm in relationship to, 1114*
Proaccelerin
role of, in blood coagulation, 302
Progesterone
-specific binding protein, transcortin, a candidate for, 1094*
Propranolol
effects of beta-adrenergic blockade on cardiac response to maximal and submaximal exercise in man, 1745
Protein binding
dialyzability, renal excretion, and, of plasma conjugated bilirubin, 666
Protein depletion
body composition in severe infantile malnutrition, 417
Protein synthesis
in vitro, in isolated rat glomeruli, 1107*
in vivo studies of the production of haptoglobin, fibrinogen, and γ-globulin by the canine liver, 574
interrelationship of, and hormone action, 1064*
studies of, in human and canine blood vessels, 1035*
suppression of delayed hypersensitivity *in vitro* by inhibition of, 1039*
Proteins
α_1-acid glycoprotein variants of normal Caucasian and Japanese individuals, 1394
serum, preparation of I^{131}-labeled human serum prealbumin and its metabolism in normal and sick patients, 1600
Prothrombin conversion
role of proaccelerin in human blood coagulation; evidence that proaccelerin is converted to a prothrombin-converting principle by activated Stuart factor: with notes on anticoagulant action of soybean trypsin inhibitor, protamine sulfate, and hexadimethrine bromide, 302
Prothrombin formation
vitamin K-induced, effect of actinomycin D upon, in dicumarolized rats, 1082*
Proximal tubule
effect of saline infusion on sodium reabsorption by, of dog, 1160
micropuncture study of effects of acute reductions in glomerular filtration rate on sodium and water reabsorption in, 1050*, 1410
Pseudocholinesterase deficiency
complete, genetic and immunologic characterization, 486
Pulmonary arterial pressure
at high pulmonary flow, 2040
Pulmonary capillary blood volume
alterations in pulmonary diffusing capacity and, with negative pressure breathing, 1623
effect of venous pumping in legs, 271
maximal diffusing capacity of the lung for carbon monoxide, 349
Pulmonary circulation
behavior of normal, during changes of total blood volume in man, 366
Pulmonary diffusing capacity
for carbon monoxide, functional significance, 789
"pressure-volume relationship" of normal pulmonary capillary bed, 1261
Pulmonary disease
chronic, augmented natriuretic response to acute sodium infusion in normotensive patients with, 1106*
chronic obstructive, correlation of airway resistance and maximal ventilatory rates in normal subjects and patients with, 1090*
regional lung mechanics in, 906
Pulmonary infection
nosocomial, potential role of inhalation therapy equipment in, 831
Pulmonary mechanics
effects of respiratory frequency on, 1362
Pulmonary megakaryocytes
origin and significance of, 1063*
Pulmonary resection
exercise limitation following, 1514
Pulmonary resistance
effects of respiratory frequency on pulmonary mechanics, 1362
Pulmonary surface active lipids
alterations in, during exposure to increased oxygen tension, 1737
Pulmonary surface activity
in induced pulmonary edema, 458
Pulmonary vasculature
regional vasomotor activity of, 1106*
Pulmonary ventilation-perfusion
relations after heart valve replacement or rapair in man, 406
Pulsus
paradoxus, 1882
Purine and pyrimidine nucleotides
high energy phosphate compounds in myocardium during experimental congestive heart failure, 202
Purine metabolism
study of, in xanthinuric man, 1248

Purines
renal excretion of, 623
Pyelonephritis
chronic, micropuncture studies on individual nephrons in rat with, 1071*
experimental, individual nephron function in, 1027*
prevention of, by water diuresis, evidence for role of medullary hypertonicity in promoting renal infection, 73
Pyrazinamide
inhibition and localization of distal transtubular movement of uric acid with a modified stop-flow technique, 716
Pyruvate
effect of respiratory alkalosis on blood lactate and pyruvate in humans, 1043*

R

Radiation damage
of erythrocytes, 1095*
Radiochromate binding
metabolism of individual C^{14}-labeled hemoglobins in patients with H-thalassemia, with observations on, to the hemoglobins during red cell survival, 315
Radioimmunoassay
of human plasma thyrotropin, 1277
of insulin, a rapid, simple method using "instant dialysis" with coated charcoal, 1059*
Radiomagnesium kinetics
in normal and uremic subjects, 1107*
Red blood cells
initiation and enhancement of lysis of, by activators of the first component of complement and by first component esterase; studies using normal red cells and red cells from patients with paroxysmal nocturnal hemoglobinuria, 518
mechanism of action of adenine in preservation of, 629
metabolism of individual C^{14}-labeled hemoglobins in patients with H-thalassemia, with observations on radiochromate binding to the hemoglobins during survival of, 315
oxidative hemolysis and metabolism of, in hereditary acatalasia, 1187
sodium, potassium, calcium, magnesium, copper, and zinc composition of, in vitamin B_{12} deficiency and iron deficiency, 1225
spectrochemical analysis of sodium, potassium, calcium, magnesium, copper, and zinc in normal, 379
Red cell membrane
alteration associated with "marrow stress," 1730
moving source phenomenon, result of slow passage of label across, 1055*
Refractory period
determinants of the duration of, of the atrioventricular nodal system in man, 883
Regional lung function
in patients with mitral stenosis studied with xenon^{133} during air and oxygen breathing, 999
Regional lung mechanics
in pulmonary disease, 906
Renal acidification
fructose-induced disruption of, in patients with hereditary fructose intolerance, 1076*
Renal acidosis
production, excretion, and net balance of fixed acid in patients with, 495
Renal arterial constriction
acute, effects of, on tubular reabsorption of sodium and water during an osmotic diuresis, 1720
Renal blood flow
changes in, and possibly the intrarenal distribution of blood accompanying the natriuresis of saline loading, 929, 1042*
effects of intrarenal infusions of bradykinin and acetylcholine on, in man, 1052*
in normal and autotransplanted dog kidneys; effect of hemorrhagic hypotension and mannitol, 1092*
studies on mechanism of natriuresis accompanying increased, and its role in renal response to extracellular volume expansion, 1857
Renal blood volume
and intrarenal distribution of blood flow in normal and hypertensive man, 1071*
Renal concentration
studies of defect in, in thyrotoxicosis, 1050*
Renal cortex
effect of ouabain infusion on cation binding by particulate fractions of, 1079*
Renal excretion
of virus after injection of Coxsackie B-1 virus into renal artery, 1953
Renal failure
effect of 5/6 nephrectomy on concentrating and diluting capacity of residual nephrons, 603
renal micropuncture study of the development of anuria in rat with mercury-induced acute, 449
successful long-term peritoneal dialysis in terminal, 1029*
Renal gluconeogenesis
metabolic implications of, in rate control of ammonia synthesis, 1049*
Renal hemodynamics
effect of 3',5'-cyclic AMP and other nucleotides on urine flow and, in rat, 1025*
Renal homotransplantation
cytomegalovirus infections after, 1038*
Renal infection
prevention of pyelonephritis by water diuresis; evidence for role of medullary hypertonicity in promoting, 73
Renal insufficiency
effect of, on excretion of tritiated digoxin, 1080*
Renal medulla
urea accumulation in, of dog; evidence for uphill movement, 1052*
Renal pressor material
studies on presence of, in various hypertensive diseases, 1054*
Renal tubular fluid pH
mechanism of bicarbonate reabsorption in proximal and distal tubules of kidney, 278
Renal tubular reabsorption
of iodide as compared with chloride, 1371
Renal tubular transport
effects of cardiac glycosides on, of calcium, magnesium, inorganic phosphate, and glucose in dog, 1132
Renal vascular activity
relationship of, of angiotensin II to autonomic nervous system, 1911
Renin
in pregnancy and the menstrual cycle, 1112*
Respiratory alkalosis
effect of, on blood lactate and pyruvate in humans, 1043*
Respiratory frequency
effects of, on pulmonary mechanics, 1362
Respiratory illness
production of illness with a small-particle aerosol of Coxsackie A_{21}, 535
Reticulocyte response
in treated megaloblastic anemias, a biochemical analysis, 1031*
Reticuloendothelial phagocytic function
in patients with hypersplenism and related disorders, 1085*
Rh antibodies
incomplete anti-, mechanism of direct agglutination induced by mercaptoethanol, 1352
Ribonucleic acid
biosynthesis in human leukocytes, 1036*
synthesis and degradation of, by normal and leukemic leukocytes, 1098*
Rubidium^{86}
evaluation of interrelationships between the distribution of, and myocardial blood flow, 1101*
Runt disease
malignant lymphomas in, 1097*

S

Saline diuresis
differences between saline and mannitol diuresis in hydropenic man, 182
Saline infusion
effect of caval ligation on response of proximal tubular sodium reabsorption to, 1035*
effect of, on sodium reabsorption by proximal tubule of dog, 1160
Saline loading
changes in renal blood flow and possibly the intrarenal distribution of blood during the natriuresis accompanying, in the dog, 929, 1042*
sodium excretion during, in dogs with vena caval constriction, 565
Sarcoidosis
fate of intravenously administered tritiated vitamin D_3 in normal subjects and patients with, 1026*
Sarcoplasmic reticulum
Ca^{++} uptake and ATPase of human, 1425
Schistosomiasis
nature of hepatic pigment in, 1083*
Selenomethionine
use of, as a label for canine and human platelets, 1036*
Shock
studies in clinical shock and hypotension, 1494
vasopressor amines beneficial in treatment of? 1076*
Sideroblastic anemia
refractory, heme and porphyrin synthesis in, 1106*
Sinoatrial pacemaker
interrelationship of potassium and vagal action on, and on atrioventricular conduction, 399
Sodium
composition of erythrocytes in vitamin B_{12} deficiency and iron deficiency, 1225
content of arteries, relationship between, and arterial responsiveness to sympathetic stimulation, 1025*
in red blood cells, spectrochemical analysis of, 379
pump, piston for, 1061*
Sodium absorption
effect of aldosterone on salt and water absorption from the intact human colon, 801
Sodium chloride
activity coefficients of $CaCl_2$ and, in mixed aqueous solutions, 1076*
Sodium excretion
augmented natriuretic response to acute sodium infusion in normotensive patients with chronic pulmonary disease, 1106*
changes in renal blood flow and possibly the intrarenal distribution of blood during the natriuresis accompanying saline loading in the dog, 929
during acute saline loading in dogs with vena caval constriction, 565
relationship of renal, and water to atrial pressures and cardiac output, 1100*
renal, effects of hypertonic mannitol on, in hydropenic man, 1087*
Sodium reabsorption
and secretion in human eccrine sweat gland, 1270
effect of saline infusion on, by proximal tubule of dog, 1160
inhibition of, by hypernatremia, 1144
micropuncture study of effect of acute reductions in glomerular filtration rate on, and water by proximal tubules of rat, 1050*, 1410
proximal tubular, effect of caval ligation on response of, to saline infusion, 1035*
tubular, effects of unilateral renal arterial constriction on, during osmotic diuresis, 1720
Sodium transport
concomitant increase of membrane phosphatide metabolism and, in hereditary spherocytosis, 1062*
effects of physiological concentrations of cortisol on, in erythrocytes, 1102*
electrical nature of coupled and uncoupled transport of sodium and chloride in reptilian bladder, 1054*
nature of adrenergic influence on, in frog skin, 1108*
Spherocytosis
hereditary, adenosine triphosphate metabolism in, 1417
hereditary concomitant increase of membrane phosphatide metabolism and sodium transport in, 1062*
SS blood
possible mechanism for decreased oxygen affinity of, 1031*
Starvation diabetes
metabolism in, and diabetes mellitus, 1032*
Steatorrhea
studies on pathogenesis of, in blind-loop syndrome, 1815
Steroid binding
binding of androsterone sulfate, etiocholanolone sulfate, and dehydroisoandrosterone sulfate by human plasma protein, 1234
Steroids
$C_{19}O_2$ steroids and some of their precursors in blood from normal human adrenals, 159
direct effect of, on permeability of lipid membranes (liposomes), 1109*
metabolic fate of estriol and its glucuronide, 694
Sterol
cholesterol synthesis by gastrointestinal tract; localization and mechanisms of control, 1311
fecal, sterol and bile acid excretion in man and effects of dietary fat, 1845
fecal; sterol balance in man as plasma cholesterol concentrations are altered by exchanges of dietary fats, 1482
fecal, studies on mechanism of action of unsaturated fats on cholesterol metabolism in rabbit, 1834
Stop-flow technique
localization and pyrazinamide inhibition of distal transtubular movement of uric acid with, 716
Strophanthin
effects of cardiac glycosides on renal tubular transport of calcium, magnesium, inorganic phosphate, and glucose in dog, 1132
Sucrose
intestinal absorption of, in man; site of hydrolysis and absorption, 390
Sugar transport
and fructose metabolism in human intestine *in vitro*, 1200
Sulfobromophthalein
excretion into bile, role of adenosine triphosphate depletion *in vivo* on, 1095*
transfer from blood to bile, importance of conjugation with glutathione for, 1214
Sulfonamide diuretics
site of action of furosemide and, in dog 1458
Sulfonylureas
effect of, and phenformin on lipolysis in adipose tissue, 1101*
Surfactant
pulmonary, alterations in, during exposure to increased oxygen tension, 1737
pulmonary, in induced pulmonary edema, 458
Sweat gland
sodium secretion and reabsorption in human eccrine, 1270
Sympathetic activity
relative role of changes in; effects of exercise on myocardial force-velocity relations in intact unanesthetized man, 2051
Sympathetic innervation
function of vascular smooth muscle and, in newborn dog, 241
Sympathetic nervous system
role of, in lipid mobilization during exercise, 1105*
Sympathetic stimulation
relationship between sodium content of arteries and arterial responsiveness to, 1025*
Systemic lupus erythematosus
DNA in serum of patients with, 1104*
immunofluorescent localization of immunoglobulins, complement, and fibrinogen in, 1657

T

Tachycardia
ventricular, vulnerable period for, after myocardial infarction, 1113*

T^3H_2O
differences between saline and mannitol diuresis in hydropenic man, 182

Testosterone
intranuclear localization of, in preen gland of the duck, 1111*
plasma ketosteroids and, in man; study of the pituitary-testicular axis, 657

Tetany
induced by hyperventilation in anxious subjects and effect of adrenergic blockade, 1105*

Thalassemia
distribution of hemoglobin types in thalassemic erythrocytes, 231
globin synthesis in, 1108*
metabolism of individual C^{14}-labeled hemoglobins in patients with H-thalassemia, with observations on radiochromate binding to the hemoglobins during red cell survival, 315

Thiourea
iodide, a requisite for oxidation of, by thyroid tissue, 1073*

Thoracic duct lymph
exchange of aldosterone between plasma and, in man, 1113*

Thrombin
role of platelet fibrinogen in the reactions of platelets to, 809

Thrombosis
-inducing capacity of serum, hepatic clearance of, 1040*

Thyroid
-binding globulin; new method for measuring free thyroid hormone in human serum and analysis of factors that influence its concentration, 1679
effect of acute iodide depletion on function of, in man, 1117
radioimmunoassay of human plasma thyrotropin, 1277
relationship between FFA turnover and oxygen consumption in euthyroid and hyperthyroid states, 247
responses of normal human to infusions of plasma from patients with Graves' disease, 1287
tissue; iodide, a requisite for oxidation of thiourea by, 1073*

Thyroid hormone
free, new method for measuring, in human serum and an analysis of factors that influence its concentration, 1679
sulfation of, by beef thyroid *in vitro*, 1037*

Thyroid stimulating hormone
estimation of secretion rate of, in man, 1081*
studies on mechanism of, of TPN in thyroid slices, 1046*

Thyroid stimulator
long-acting; responses of the normal human to infusions of plasma from patients with Graves' disease, 1287

Thyrotoxicosis
mechanism of certain abnormalities of the circulation to the limbs in, 947
studies of renal concentration defect in, 1050*

Thyrotropin
radioimmunoassay of human plasma, 1277
responses of normal human to infusions of plasma from patients with Graves' disease, 1287

Thyroxine
determination of rate of deiodination of, in human subjects, 1986
protein-binding, new method for measuring free thyroid hormone in human serum and an analysis of factors that influence its concentration, 1679
serum, determination of levels of, in man by thin layer chromatography, 1109*

Thyroxine-binding prealbumin
I^{131}-labeled, effect of nonthyroidal disease and surgical trauma on turnover of, 1082*
preparation of I^{131}-labeled human serum prealbumin and its metabolism in normal and sick patients, 1600

Tissue antigens
evaluation of normal lymphocyte transfer test in man, 219

Toad bladder
effect of amphotericin B on permeability of, 1328

Transacetylase
isoniazid, partial purification and properties of, in human liver, 1992

Transcortin
candidate for a progesterone-specific binding protein, 1094*

Transferrin
polarographic characteristics of, 1087*

Transplantation immunity
evaluation of normal lymphocyte transfer test in man, 219

Triglycerides
effect of ethanol on hepatic secretion of, into plasma, 1115*
effects of insulin on metabolism of, in man, 1062*
kinetics of turnover, of very low density lipoproteins of human plasma, 1826
medium chain, effect of, upon fat absorption and plasma lipid and depot fat of children with cystic fibrosis of pancreas, 1924
molecules, long-term stability of, in adipose tissue, 1055*, 1978
plasma, dynamics of turnover of, 1093*
role of monoglyceride in hydrolysis of, within fat cell, 1057*

Tubular reabsorption
of sodium and water, effects of unilateral renal arterial constriction on, during osmotic diuresis, 1720
regulation of, as studied by stopped flow microperfusion in rat kidney, 1031*
renal, of iodide as compared with chloride, 1371
sodium, inhibition of, by hypernatremia, 1144

Turtle bladder
electrical nature of coupled and uncoupled transport of sodium and chloride in, 1054*

Tyrosine
plasma concentration, cortisone-provoked depression of, 1690

U

Urea
accumulation in renal medulla of dog, evidence for uphill movement, 1052*

Urease activity
gastrointestinal, in man, 1103*

Uremia
disorders of calcium metabolism in, 1053*

Uric acid
localization and pyrazinamide inhibition of distal transtubular movement of, with a modified stop-flow technique, 716

Urinary concentration and dilution
effect of 5/6 nephrectomy on concentrating and diluting capacity of residual nephrons, 603

Urinary tract infections
significance of bacterial variants in urine of patients with chronic bacteriuria, 1945
studies on epidemiology of *Escherichia coli* infections; evidence for a nosocomial flora, 193

Urine
acid mucopolysaccharides in kidney and, of dog, 1034*
characterization of antibodies in, 703
effect of 3′,5′-cyclic AMP and other nucleotides on flow of, and hemodynamics in rat, 1025*
variations in dietary protein and sodium and the solute composition of, in man, 1052*

Urobilinogen
enterohepatic circulation of, in the rat, 722

Uterine hemorrhage
in pregnancy, folic acid deficiency as a cause of, 1102*

V

Vagal action
interrelationship of potassium and, on the sinoatrial pacemaker and on atrioventricular conduction, 399

Vascular resistance
pulmonary arterial pressure at high pulmonary flow, 2040
Vascular responses
function of vascular smooth muscle and its sympathetic innervation in newborn dog, 241
Vasculitis
immune studies in; associated with 19 S-7 S type of cryoglobulinemia, 1075*
Vasopressin
effect of, on water permeability of isolated perfused collecting tubules, 1055*
modification of the antidiuretic effect of, by acid and alkaline loads, 754
Vasopressor amines
beneficial in treatment of shock? 1076*
Vena caval constriction
sodium excretion during acute saline loading in dogs with, 565
Vena caval flow
pulsus paradoxus, 1882
Venous pumping
in legs as a determinant of pulmonary capillary filling, 271
Venous tone
forearm venous responses to stimulation of adrenergic receptors, 1151
Ventilation
causes of uneven, 1069*
regional lung function in patients with mitral stenosis studied with xenon^{133} during oxygen and air breathing, 999
Ventilation-perfusion
abnormalities in experimental pulmonary embolism, 1699
alterations of, ratios distribution associated with successive clinical stages of pulmonary emphysema, 1566
pulmonary, relations after heart valve replacement or repair in man, 406
Ventilatory rates
maximal, correlation of airway resistance and, in normal subjects and patients with chronic obstructive pulmonary disease, 1090*
Ventricular arrhythmias
relation of, during coronary thrombosis to myocardial K^+ transfer, 1089*
Ventricular contractility
in man, assessed in terms of indexes of force and velocity, 1083*
Ventricular function
analysis of inotropic effect of digitalis and *l*-norepinephrine on, 1078*
atrial contribution to, 1033*
Ventricular volume
calculation of, from single plane (A-P) angiocardiograms, 1094*
Viral hepatitis
persistent, mesenchymal cell proliferation in, 1066*
Viral infection
experimental; production of illness with a small-particle aerosol of Coxsackie A_{21}, 535
response of volunteers to inoculation with hemagglutinin-positive and hemagglutinin-negative variants of Coxsackie A_{21} virus, 1125
two different interferons induced in human leukocyte cultures by, and phytohemagglutinin, 1110*
Viruria
after injection of Coxsackie B-1 virus into a renal artery, 1953
Vitamin A
absorption and metabolism of radioactive β-carotene and, in man, 1054*
Vitamin B_{12} deficiency
sodium, potassium, calcium, magnesium, copper, and zinc composition of erythrocytes in, and iron deficiency, 1225
Vitamin D_3
fate of intravenously administered tritiated, in normal subjects and patients with sarcoidosis, 1026*
formation of bile acids from, in rat, 1027*
Vitamin D deficiency
actions of parathyroid hormone in, in dog, 2003
Vitamins
effect of deficiencies of, on intestinal transport of amino acids, 1090*
Von Gierke's disease
intestinal glucose-6-phosphatase activity in patients with, and their parents, 1240

W

Water absorption
effect of aldosterone on salt absorption and, from the intact human colon, 801
Water diuresis
prevention of pyelonephritis by; evidence for role of medullary hypertonicity in promoting renal infection, 73
Water permeability
effect of vasopressin on, of isolated perfused collecting tubules, 1055*
Water reabsorption
micropuncture study of effects of acute reductions in glomerular filtration rate on sodium reabsorption and, in proximal tubules, 1050*, 1410
tubular, during osmotic diuresis; effects of unilateral renal arterial constriction on, 1720

X

Xanthinuria
renal excretion of oxypurines, 623
study of purine utilization and excretion in, 1248

Z

Zinc
absorption of, in iron deficiency, 1470
composition of erythrocytes in vitamin B_{12} deficiency and iron deficiency, 1225
in red blood cells, spectrochemical analysis of, 379

CONTENTS

NUMBER 1, JANUARY 1965

Responses of Adrenal Corticosteroid Secretion to Hypotension and Hypovolemia. Donald S. Gann and Richard H. Egdahl 1

Intracellular Acid-Base Regulation. I. The Response of Muscle Cells to Changes in CO_2 Tension or Extracellular Bicarbonate Concentration. Sheldon Adler, Arlene Roy, and Arnold S. Relman 8

Intracellular Acid-Base Regulation. II. The Interaction between CO_2 Tension and Extracellular Bicarbonate in the Determination of Muscle Cell pH. Sheldon Adler, Arlene Roy, and Arnold S. Relman 21

The Early Appearing Bilirubin: Evidence for Two Components. T. Yamamoto, Joan Skanderbeg, A. Zipursky, and L. G. Israels 31

Studies on Hemoglobin Biosynthesis: Asynchronous Synthesis of Hemoglobin A and Hemoglobin A_2 by Erythrocyte Precursors. Ronald F. Rieder and David J. Weatherall 42

Effect of Human Growth Hormone on Muscle and Adipose Tissue Metabolism in the Forearm of Man. David Rabinowitz, Gerald A. Klassen, and Kenneth L. Zierler 51

Slowly Sedimenting Mercaptoethanol-resistant Antinuclear Factors Related Antigenically to M Immunoglobulins (γ_{1M}-Globulin) in Patients with Systemic Lupus Erythematosus. Naomi F. Rothfield, Blas Frangione, and Edward C. Franklin 62

Prevention of Pyelonephritis by Water Diuresis: Evidence for the Role of Medullary Hypertonicity in Promoting Renal Infection. Vincent T. Andriole and Franklin H. Epstein 73

Effects of Epinephrine on Forearm Blood Flow and Metabolism in Man. Marcel A. Baltzan, Reubin Andres, Gordon Cader, and Kenneth L. Zierler 80

The Mechanism of Denervation Natriuresis. Donald E. Kamm and Norman G. Levinsky 93

Bone Resorption in Tissue Culture. Factors Influencing the Response to Parathyroid Hormone. Lawrence G. Raisz 103

Influence of the Gastrointestinal Iodide Cycle on the Early Distribution of Radioactive Iodide in Man. Marguerite T. Hays and David H. Solomon 117

A New Oral Isotopic Test of Calcium Absorption. Louis V. Avioli, Joseph E. McDonald, Richard A. Singer, and Philip H. Henneman 128

The Passive Transfer of Immediate Type Hypersensitivity from Man to Other Primates. Roy Patterson, Jordan N. Fink, Edwin T. Nishimura, and Jacob J. Pruzansky 140

pH Optima in Immune Hemolysis: A Comparison between Guinea Pig and Human Complement. Stanley Yachnin and Janet M. Ruthenberg 149

$C_{19}O_2$ Steroids and Some of Their Precursors in Blood from Normal Human Adrenals. Ralph G. Wieland, Constance de Courcy, Richard P. Levy, Antonia P. Zala, and H. Hirschmann 159

NUMBER 2, FEBRUARY 1965

Experimental Metabolic Acidosis: The Enzymatic Basis of Ammonia Production by the Dog Kidney. Victor E. Pollak, Hermann Mattenheimer, Hendrina DeBruin, and Karla J. Weinman 169

Differences between Saline and Mannitol Diuresis in Hydropenic Man. Martin Goldberg, Donna K. McCurdy, and Manuel A. Ramirez 182

Studies on the Epidemiology of *Escherichia coli* Infections. IV. Evidence for a Nosocomial Flora. Roger P. Kennedy, James J. Plorde, and Robert G. Petersdorf 193

High Energy Phosphate Compounds in the Myocardium during Experimental Congestive Heart Failure. Purine and Pyrimidine Nucleotides, Creatine, and Creatine Phosphate in Normal and in Failing Hearts. Arthur C. Fox, Norman S. Wikler, and George E. Reed 202

An Evaluation of the Normal Lymphocyte Transfer Test in Man. D. B. Amos, P. J. Nicks, N. Peacocke, and H. O. Sieker 219

The Distribution of Hemoglobin Types in Thalassemic Erythrocytes. Dimitris Loukopoulos and Phaedon Fessas 231

Function of Vascular Smooth Muscle and Its Sympathetic Innervation in the Newborn Dog. D. L. Boatman, R. A. Shaffer, R. L. Dixon, and M. J. Brody 241

Relationship between Free Fatty Acid Turnover and Total Body Oxygen Consumption in the Euthyroid and Hyperthyroid States. R. Philip Eaton, Daniel Steinberg, and Ronald H. Thompson 247

Characterization of Fat Particles in Plasma of Hyperlipemic Subjects Maintained on Fat-free High Carbohydrate Diets. Edwin L. Bierman, Daniel Porte, Jr., David D. O'Hara, Maurice Schwartz, and Francis C. Wood, Jr. 261

The Venous Pump in the Legs as a Determinant of Pulmonary Capillary Filling. Walter J. Daly, Richard A. Krumholz, and Joseph C. Ross 271

The Mechanism of Bicarbonate Reabsorption in the Proximal and Distal Tubules of the Kidney. Floyd C. Rector, Jr., Norman W. Carter, and Donald W. Seldin 278

The Response of Extracellular Hydrogen Ion Concentration to Graded Degrees of Chronic Hypercapnia: The Physiologic Limits of the Defense of pH. William B. Schwartz, Newton C. Brackett, Jr., and Jordan J. Cohen 291

The Role of Proaccelerin in Human Blood Coagulation. Evidence that Proaccelerin Is Converted to a Prothrombin-converting Principle by Activated Stuart Factor: With Notes on the Anticoagulant Action of Soybean Trypsin Inhibitor, Protamine Sulfate, and Hexadimethrine Bromide. Robert T. Breckenridge and Oscar D. Ratnoff 302

The Metabolism of the Individual Cr^{51}-labeled Hemoglobins in Patients with H-Thalassemia, with Observations on Radiochromate Binding to the Hemoglobins during Red Cell Survival. Thomas G. Gabuzda, David G. Nathan, and Frank H. Gardner 315

The Role of Chloride in Hypokalemic Alkalosis in the Rat. A. Struyvenberg, J. de Graeff, and L. D. F. Lameijer 326

Effect of Fatty Acid Saturation on the Distribution of the Cholesterol Moiety of Very Low Density Lipoproteins. Norton Spritz 339

Announcement of Meetings 181

NUMBER 3, MARCH 1965

Maximal Diffusing Capacity of the Lung for Carbon Monoxide. Robert L. Johnson, Jr., Harold F. Taylor, and W. Harold Lawson, Jr. 349

Decreased Plasma Clearance and Hepatic Extraction of Aldosterone in Patients with Heart Failure. C. A. Camargo, A. J. Dowdy, E. W. Hancock, and J. A. Luetscher 356

Behavior of Normal Pulmonary Circulation during Changes of Total Blood Volume in Man. Flavio M. de Freitas, Eduardo Z. Faraco, Decio F. de Azevedo, Jaime Zaduchliver, and Isaac Lewin 366

Spectrochemical Analysis of Sodium, Potassium, Calcium, Magnesium, Copper, and Zinc in Normal Human Erythrocytes. Leslie S. Valberg, James M. Holt, Eleanor Paulson, and John Szivek 379

Intestinal Absorption of Sucrose in Man: The Site of Hydrolysis and Absorption. Gary M. Gray and Franz J. Ingelfinger 390

Interrelationship of Potassium and Vagal Action on the Sinoatrial Pacemaker and on Atrioventricular Conduction. Harvey Feigenbaum, Charles M. Wunsch, and Charles Fisch . . 399
Pulmonary Ventilation-Perfusion Relations after Heart Valve Replacement or Repair in Man. J. Hedley-Whyte, H. Corning, M. B. Laver, W. G. Austen, and H. H. Bendixen 406
Body Composition in Severe Infantile Malnutrition. J. S. Garrow, K. Fletcher, and D. Halliday 417
Heterogeneity of Plasma High Density Lipoproteins. Robert I. Levy and Donald S. Fredrickson 426
Cystinuria: Defective Intestinal Transport of Dibasic Amino Acids and Cystine. S. O. Thier, S. Segal, M. Fox, A. Blair, and L. E. Rosenberg 442
Renal Micropuncture Study of the Development of Anuria in the Rat with Mercury-induced Acute Renal Failure. William J. Flanigan and Donald E. Oken 449
Pulmonary Surface Activity in Induced Pulmonary Edema. Sami I. Said, Mary Ellen Avery, Ronald K. Davis, Chandra M. Banerjee, and M. El-Gohary 458
Origin of Estrogen in Women Pregnant with an Anencephalic Fetus. Paul C. MacDonald and Pentti K. Siiteri 465
Immunofluorescent Studies in Adult Celiac Disease. Walter Rubin, Anthony Stephen Fauci, Marvin H. Sleisenger, and Graham H. Jeffries 475
Complete Pseudocholinesterase Deficiency: Genetic and Immunologic Characterization. W. E. Hodgkin, E. R. Giblett, H. Levine, W. Bauer, and A. G. Motulsky 486
Announcements of Meetings 365

NUMBER 4, APRIL 1965

Production, Excretion, and Net Balance of Fixed Acid in Patients with Renal Acidosis. A. David Goodman, Jacob Lemann, Jr., Edward J. Lennon, and Arnold S. Relman 495
The Net Balance of Acid in Subjects Given Large Loads of Acid or Alkali. Jacob Lemann, Jr., Edward J. Lennon, A. David Goodman, John R. Litzow, and Arnold S. Relman 507
The Initiation and Enhancement of Human Red Cell Lysis by Activators of the First Component of Complement and by First Component Esterase; Studies Using Normal Red Cells and Red Cells from Patients with Paroxysmal Nocturnal Hemoglobinuria. Stanley Yachnin and Janet M. Ruthenberg 518
Production of Illness with a Small-Particle Aerosol of Coxsackie A_{21}. Robert B. Couch, Thomas R. Cate, Peter J. Gerone, William F. Fleet, David J. Lang, William R. Griffith, and Vernon Knight 535
The Role of the Intestinal Mucosa in Iron Absorption. R. W. Charlton, P. Jacobs, J. D. Torrance, and T. H. Bothwell 543
Studies of Lymphocyte Transfer Reactions in Hodgkin's Disease. Alan C. Aisenberg 555
Sodium Excretion during Acute Saline Loading in Dogs with Vena Caval Constriction. Norman G. Levinsky and Richard C. Lalone 565
Haptoglobin Synthesis. I. *In Vivo* Studies of the Production of Haptoglobin, Fibrinogen, and γ-Globulin by the Canine Liver. Chester A. Alper, John H. Peters, Alan G. Birtch, and Frank H. Gardner 574
The Excretion of Acid in Unilateral Renal Disease in Man. Philip R. Steinmetz, Robert P. Eisinger, and Jerome Lowenstein 582
Relationship between Particle Size and Biological Activity of *E. coli* Boivin Endotoxin. Hermann Beer, Theophil Staehelin, Herndon Douglas, and Abraham I. Braude 592
Studies of Experimental Renal Failure in Dogs. I. Effect of 5/6 Nephrectomy on Concentrating and Diluting Capacity of Residual Nephrons. Jack W. Coburn, Harvey C. Gonick, Milton E. Rubini, and Charles R. Kleeman 603

Studies of Myosin in Hereditary Muscular Dystrophy in Mice. Marvin Smoller and Richard A. Fineberg 615
The Renal Excretion of Oxypurines. Stephen Goldfinger, James R. Klinenberg, and J. Edwin Seegmiller 623
The Mechanism of Action of Adenine in Red Cell Preservation. Yoshiki Sugita and Ernest R. Simon 629
Leukokinetic Studies. IX. Experimental Evaluation of a Model of Granulopoiesis. D. R. Boggs, J. W. Athens, G. E. Cartwright, and M. M. Wintrobe 643
Plasma Ketosteroids and Testosterone in Man: A Study of the Pituitary-testicular Axis. Marvin A. Kirschner, Mortimer B. Lipsett, and David R. Collins 657
Dialyzability, Protein Binding, and Renal Excretion of Plasma Conjugated Bilirubin. Milford Fulop, John Sandson, and Paul Brazeau 666
On the Mechanism of Hyposthenuria in Hypercalcemia. Norman Bank and Hagop S. Aynedjian 681
Studies on Phenolic Steroids in Human Subjects. VII. Metabolic Fate of Estriol and Its Glucuronide. Avery A. Sandberg and W. Roy Slaunwhite, Jr. 694
Announcement of Meetings 506
Program of the Twenty-second Annual Meeting of the American Federation for Clinical Research to be held in Atlantic City, N. J., May 2, 1965 i
Program of the Fifty-seventh Annual Meeting of the American Society for Clinical Investigation to be held in Atlantic City, N. J., May 3, 1965 vii
Listing of Exhibits viii

NUMBER 5, MAY 1965

Characterization of Antibodies in Human Urine. Lars A. Hanson and Eng M. Tan 703
Localization and Pyrazinamide Inhibition of Distal Transtubular Movement of Uric Acid-2-C^{14} with a Modified Stop-Flow Technique. Bernard B. Davis, James B. Field, Gerald P. Rodnan, and Laurence H. Kedes 716
Intestinal Absorption of Bile Pigments. III. The Enterohepatic Circulation of Urobilinogen in the Rat. Roger Lester and Rudi Schmid 722
N^{15} Tracer Studies on the Origin of Urinary Ammonia in the Acidotic Dog, with Notes on the Enzymatic Synthesis of Labeled Glutamic Acid and Glutamines. Robert F. Pitts, Lou Ann Pilkington, and Jeannette C. M. de Haas 731
Studies of the Effects of Administration of ACTH and Adrenal Corticosteroids on Erythrophagocytosis. Robert M. Greendyke, Edwin M. Bradley, and Scott N. Swisher 746
Modification of the Antidiuretic Effect of Vasopressin by Acid and Alkaline Loads. T. D. Ullmann, W. J. Czaczkes, and J. Menczel 754
Leukokinetic Studies. X. Blood Granulocyte Kinetics in Chronic Myelocytic Leukemia. J. W. Athens, S. O. Raab, O. P. Haab, D. R. Boggs, H. Ashenbrucker, G. E. Cartwright, and M. M. Wintrobe 765
Leukokinetic Studies. XI. Blood Granulocyte Kinetics in Polycythemia Vera, Infection, and Myelofibrosis. J. W. Athens, O. P. Haab, S. O. Raab, D. R. Boggs, H. Ashenbrucker, G. E. Cartwright, and M. M. Wintrobe 778
Functional Significance of a Low Pulmonary Diffusing Capacity for Carbon Monoxide. Robert L. Johnson, Jr., Harold F. Taylor, and Arthur C. DeGraff, Jr. 789
Effect of *d*-Aldosterone on Salt and Water Absorption from the Intact Human Colon. Ruven Levitan and F. J. Ingelfinger 801
Role of Platelet Fibrinogen in the Reactions of Platelets to Thrombin. Edward E. Morse, Dudley P. Jackson, and C. Lockard Conley 809

The Mechanism of the Fructose Effect on the Ethanol Metabolism of the Human Liver. Niels Tygstrup, Kjeld Winkler, and Frank Lundquist 817
The Potential Role of Inhalation Therapy Equipment in Nosocomial Pulmonary Infection. James Allen Reinarz, Alan K. Pierce, Benita B. Mays, and Jay P. Sanford 831
The Role of Carnitine in Acetoacetate Production and Fatty Acid Synthesis. Rubin Bressler and Richard I. Katz 840
The Influence of Bacteriocins on Resistance to Infection by Gram-negative Bacteria. I. The Effect of Colicin on Bactericidal Power of Blood. A. I. Braude and J. S. Siemienski 849
The Liver and Postheparin Plasma Lipolytic Activity in Dog and Man. Robert E. Condon, Hillel Tobias, and Dharam V. Datta 860
Studies of the Insulin-inhibitory Effect of Human Albumin Fractions. Haluk Alp and Lillian Recant 870

NUMBER 6, JUNE 1965

Determinants of the Duration of the Refractory Period of the Atrioventricular Nodal System in Man. Joseph W. Linhart, Eugene Braunwald, and John Ross, Jr. 883
The Effect of Chlorophenoxyisobutyric Acid and Ethinyl Estradiol on Chlolesterol Turnover. Paul J. Nestel, Eugene Z. Hirsch, and Elizabeth A. Couzens 891
Bronchial Pressure Measurements in Emphysema and Bronchitis. Peter T. Macklem, Robert G. Fraser, and William G. Brown 897
Regional Lung Mechanics in Pulmonary Disease. C. J. Martin, A. C. Young, and Koh Ishikawa 906
Clinical Significance of a Hydroxyproline-containing Protein in Human Plasma. E. Carwile LeRoy and Albert Sjoerdsma 914
Quantitative Studies of Febrile Tolerance and Levels of Specific Antibody Evoked by Bacterial Endotoxin. John H. Mulholland, Sheldon M. Wolff, Anne L. Jackson, and Maurice Landy 920
Changes in Renal Blood Flow and Possibly the Intrarenal Distribution of Blood during the Natriuresis Accompanying Saline Loading in the Dog. Laurence E. Earley and Robert M. Friedler 929
Effects of Serum Calcium Level and Parathyroid Extracts on Phosphate and Calcium Excretion in Hypoparathyroid Patients. Eugene Eisenberg 942
Mechanism of Certain Abnormalities of the Circulation to the Limbs in Thyrotoxicosis. Hermes A. Kontos, William Shapiro, H. Page Mauck, Jr., David W. Richardson, John L. Patterson, Jr., and Alton R. Sharpe, Jr. 947
Impaired Aldosterone Production in "Salt-losing" Congenital Adrenal Hyperplasia. George T. Bryan, Bernard Kliman, and Frederic C. Bartter 957
The Contractile Properties of Human Heart Muscle: Studies on Myocardial Mechanics of Surgically Excised Papillary Muscles. Edmund H. Sonnenblick, Eugene Braunwald, and Andrew G. Morrow 966
Myocardial Force-Velocity Relations Studied in Intact Unanesthetized Man. Gerald Glick, Edmund H. Sonnenblick, and Eugene Braunwald 978
Human Fetal Erythrocyte and Plasma Lipids. James Crowley, Peter Ways, and John W. Jones 989
Regional Lung Function in Patients with Mitral Stenosis Studied with Xenon^{133} during Air and Oxygen Breathing. Arthur Dawson, Kenzo Kaneko, and Maurice McGregor 999
Effects of Prolonged Ethanol Intake: Production of Fatty Liver Despite Adequate Diets. Charles S. Lieber, Don P. Jones, and Leonore M. DeCarli 1009
Proceedings of the Fifty-seventh Annual Meeting of the American Society for Clinical Investigation, Inc., held in Atlantic City, N. J., May 3, 1965 1022

CONTENTS

NUMBER 7, JULY 1965

The Effect of Acute Iodide Depletion on Thyroid Function in Man. Russell M. Barakat and Sidney H. Ingbar 1117

Response of Volunteers to Inoculation with Hemagglutinin-positive and Hemagglutinin-negative Variants of Coxsackie A_{21} Virus. David J. Lang, Thomas R. Cate, Robert B. Couch, Vernon Knight, and Karl M. Johnson 1125

Effects of Cardiac Glycosides on Renal Tubular Transport of Calcium, Magnesium, Inorganic Phosphate, and Glucose in the Dog. Sherman Kupfer and Jonah D. Kosovsky 1132

Inhibition of Renal Tubular Sodium Reabsorption by Hypernatremia. Donald E. Kamm and Norman G. Levinsky 1144

Forearm Venous Responses to Stimulation of Adrenergic Receptors. John W. Eckstein, Michael G. Wendling, and François M. Abboud 1151

The Effect of Saline Infusion on Sodium Reabsorption by the Proximal Tubule of the Dog. John H. Dirks, William J. Cirksena, and Robert W. Berliner 1160

Prolonged Infusions of Angiotension II and Norepinephrine and Blood Pressure, Electrolyte Balance, and Aldosterone and Cortisol Secretion in Normal Man and in Cirrhosis with Ascites. Richard P. Ames, Abraham J. Borkowski, Alfred M. Sicinski, and John H. Laragh 1171

Oxidative Hemolysis and Erythrocyte Metabolism in Hereditary Acatalasia. Harry S. Jacob, Sidney H. Ingbar, and James H. Jandl 1187

Sugar Transport and Fructose Metabolism in Human Intestine *In Vitro*. Lawrence W. White and Bernard R. Landau 1200

The Importance of Conjugation with Glutathione for Sulfobromophthalein Sodium (BSP) Transfer from Blood to Bile. Burton Combes 1214

Sodium, Potassium, Calcium, Magnesium, Copper, and Zinc Composition of Erythrocytes in Vitamin B_{12} Deficiency and Iron Deficiency. Leslie S. Valberg, John M. Holt, and G. Malcolm Brown 1225

The Binding of Androsterone Sulfate, Etiocholanolone Sulfate, and Dehydroisoandrosterone Sulfate by Human Plasma Protein. John E. Plager 1234

Studies in Glycogen Storage Diseases. I. Intestinal Glucose-6-Phosphatase Activity in Patients with Von Gierke's Disease and Their Parents. James B. Field, Sheldon Epstein, and Thomas Egan 1240

The Study of Purine Utilization and Excretion in a Xanthinuric Man. John H. Ayvazian and Solomon Skupp 1248

The "Pressure-Volume Relationship" of the Normal Pulmonary Capillary Bed. Walter J. Daly, Samuel T. Giammona, and Joseph C. Ross 1261

Sodium Secretion and Reabsorption in the Human Eccrine Sweat Gland. Gary W. Cage and Richard L. Dobson 1270

NUMBER 8, AUGUST 1965

Radioimmunoassay of Human Plasma Thyrotropin. Robert D. Utiger 1277

Responses of the Normal Human to Infusions of Plasma from Patients with Graves' Disease. Claude D. Arnaud, Hans A. Kneubuhler, Virginia L. Seiling, Bruce K. Wightman, and Norman H. Engbring 1287

Load, Work, and Velocity of Muscle Shortening of the Left Ventricle in Normal and Abnormal Human Hearts. D. E. L. Wilcken 1295
Cholesterol Synthesis by the Gastrointestinal Tract: Localization and Mechanisms of Control. John M. Dietschy and Marvin D. Siperstein 1311
Effect of Amphotericin B on the Permeability of the Toad Bladder. Norman S. Lichtenstein and Alexander Leaf 1328
Effect of Acute Increase in Intracranial Pressure on Blood Flow in the Internal Carotid Artery of Man. Joseph C. Greenfield, Jr., and George T. Tindall 1343
On "Incomplete" Anti-Rh Antibodies: Mechanism of Direct Agglutination Induced by Mercaptoethanol. W. J. Mandy, H. H. Fudenberg, and F. B. Lewis 1352
Some Effects of Respiratory Frequency on Pulmonary Mechanics. Charles D. Albright and Stuart Bondurant 1362
Renal Tubular Reabsorption of Iodide as Compared with Chloride. Mackenzie Walser and W. Joseph Rahill 1371
Transport of Neutral and Dibasic Amino Acids by Human Leukocytes: Absence of Defect in Cystinuria. Leon E. Rosenberg and Sylvia Downing 1382
The α_1-Acid Glycoprotein Variants of Normal Caucasian and Japanese Individuals. K. Schmid, K. Tokita, and H. Yoshizaki 1394
Effect of 6-Mercaptopurine on Endotoxin Tolerance. Sheldon M. Wolff, John H. Mulholland, Stanley B. Ward, Melvin Rubenstein, and Peter D. Mott 1402
Micropuncture Study of the Effect of Acute Reductions in Glomerular Filtration Rate on Sodium and Water Reabsorption by the Proximal Tubules of the Rat. Sheldon Glabman, Hagop S. Aynedjian, and Norman Bank 1410
Adenosine Triphosphate Metabolism in Hereditary Spherocytosis. Daniel N. Mohler 1417
Ca^{++} Uptake and ATPase of Human Sarcoplasmic Reticulum. F. J. Samaha and J. Gergely 1425

NUMBER 9, SEPTEMBER 1965

Metabolism of Aldosterone in Several Experimental Situations with Altered Aldosterone Secretion. James O. Davis, Michael J. Olichney, Torrey C. Brown, and Peter F. Binnion 1433
Transient Familial Neonatal Hyperbilirubinemia. Irwin M. Arias, Sonia Wolfson, Jerold F. Lucey, and R. James McKay, Jr. 1442
Preservation of Dietary Triglycerides in the Secondary Particles of Alimentary Lipemia. Enoch Gordis 1451
The Site of Action of Furosemide and Other Sulfonamide Diuretics in the Dog. Wadi Suki, Floyd C. Rector, Jr., and Donald W. Seldin 1458
The Absorption of Nonferrous Metals in Iron Deficiency. Simeon Pollack, James N. George, Richard C. Reba, Richard M. Kaufman, and William H. Crosby 1470
Urinary Ammonium Excretion in Primary Gout. Alexander B. Gutman and Ts'ai-fan Yü 1474
Sterol Balance in Man as Plasma Cholesterol Concentrations Are Altered by Exchanges of Dietary Fats. Norton Spritz, E. H. Ahrens, Jr., and Scott Grundy 1482
Studies in Clinical Shock and Hypotension. II. Hemodynamic Effects of Norepinephrine and Angiotensin. Jay N. Cohn and Myron H. Luria 1494
Aldosterone Secretion Rate in Congenital Adrenal Hyperplasia. A Discussion of the Theories on the Pathogenesis of the Salt-losing Form of the Syndrome. Avinoam Kowarski, Jordan W. Finkelstein, John S. Spaulding, Gerald H. Holman, and Claude J. Migeon 1505
Exercise Limitation Following Extensive Pulmonary Resection. A. C. DeGraff, Jr., H. F. Taylor, J. W. Ord, T. H. Chuang, and R. L. Johnson, Jr. 1514

IgG (7 S Gamma Globulin) Metabolism in Hypogammaglobulinemia: Studies in Patients with Defective Gamma Globulin Synthesis, Gastrointestinal Protein Loss, or Both. Thomas A. Waldmann and Paul J. Schwab 1523

The Hemolysis of Red Cells from Patients with Paroxysmal Nocturnal Hemoglobinuria by Partially Purified Subcomponents of the Third Complement Component. Stanley Yachnin 1534

Radioactive Calcium Kinetics during High Calcium Intake in Osteoporosis. Ernest Schwartz, Vincent A. Panariello, and John Saeli 1547

Effects of Long-Term Storage on Human Serum Albumin. II. Follow-up of Chromatographically and Ultracentrifugally Detectable Changes. J. S. Finlayson 1561

Alterations of Ventilation to Perfusion Ratios Distribution Associated with Successive Clinical Stages of Pulmonary Emphysema. Claude Lenfant and William R. Pace, Jr. 1566

Alteration of Blood Group Antigens in Leukemic Lymphocytes. Jerome I. Brody and Lawrence H. Beizer 1582

NUMBER 10, OCTOBER 1965

Diffusing Capacity and Pulmonary Capillary Blood Flow at Hyperbaric Pressures. Jean R. Nairn, Gordon G. Power, R. W. Hyde, R. E. Forster, C. J. Lambertsen, and J. Dickson 1591

Preparation of I^{131}-labeled Human Serum Prealbumin and Its Metabolism in Normal and Sick Patients. Edward L. Socolow, Kenneth A. Woeber, Robert H. Purdy, Mary T. Holloway, and Sidney H. Ingbar 1600

The Composition and Structure of Lymph Chylomicrons in Dog, Rat, and Man. D. B. Zilversmit 1610

Alterations in Pulmonary Diffusing Capacity and Pulmonary Capillary Blood Volume with Negative Pressure Breathing. Sheldon H. Steiner, Regina Frayser, and Joseph C. Ross 1623

Myoglobin and Cytochrome Response during Repair of Iron Deficiency in the Rat. Peter R. Dallman and Herbert C. Schwartz 1631

Lipid Metabolism in the Newborn Heart. Benjamin Wittels and Rubin Bressler 1639

Proteinpolysaccharides from Human Articular and Costal Cartilage. Lawrence Rosenberg, Blanche Johnson, and Maxwell Schubert 1647

Immunofluorescent Localization of Immunoglobulins, Complement, and Fibrinogen in Human Diseases. I. Systemic Lupus Erythematosus. Fiorenzo Paronetto and David Koffler ... 1657

Immunofluorescent Localization of Immunoglobulins, Complement, and Fibrinogen in Human Diseases. II. Acute, Subacute, and Chronic Glomerulonephritis. David Koffler and Fiorenzo Paronetto 1665

The Experimental Generation of Antibodies to α-Melanocyte Stimulating Hormone and Adrenocorticotropic Hormone. Joseph McGuire, Raymond McGill, Susan Leeman, and Theodore Goodfriend 1672

A New Method for Measuring the Free Thyroid Hormone in Human Serum and an Analysis of the Factors That Influence Its Concentration. Sidney H. Ingbar, Lewis E. Braverman, Nancy A. Dawber, and Glenn Y. Lee 1679

Cortisone-provoked Depression of Plasma Tyrosine Concentration: Relation to Enzyme Induction in Man. Richard S. Rivlin and Kenneth L. Melmon 1690

Ventilation-Perfusion Abnormalities in Experimental Pulmonary Embolism. Steven E. Levy, Myron Stein, Robert S. Totten, Isreal Bruderman, Stanford Wessler, and Eugene D. Robin 1699

Homocystinuria Due to Cystathionine Synthase Deficiency: The Metabolism of L-Methionine. Leonard Laster, S. Harvey Mudd, James D. Finkelstein, and Filadelfo Irreverre 1708

Effects of Unilateral Renal Arterial Constriction on Tubular Reabsorption of Sodium and Water during an Osmotic Diuresis. Richard M. Stein, Ruth G. Abramson, D. Danny Bercovitch, and Marvin F. Levitt 1720

Red Cell Membrane Alteration Associated with "Marrow Stress." R. S. Hillman and E. R. Giblett 1730

NUMBER 11, NOVEMBER 1965

Alterations in Pulmonary Surface Active Lipids during Exposure to Increased Oxygen Tension. Thomas E. Morgan, Theodore N. Finley, Gary L. Huber, and Helen Fialkow 1737

Effects of Beta-Adrenergic Blockade on the Cardiac Response to Maximal and Submaximal Exercise in Man. Stephen E. Epstein, Brian F. Robinson, Richard L. Kahler, and Eugene Braunwald 1745

The Effect of Dietary Fat on the Turnover of Cholic Acid and on the Composition of the Biliary Bile Acids in Man. Sven Lindstedt, Joel Avigan, DeWitt S. Goodman, Jan Sjövall, and Daniel Steinberg 1754

Intestinal Absorption and Esterification of ^{14}C-labeled Fatty Acids in Man. Rolf Blomstrand, Josef Gürtler, and Bengt Werner 1766

Immunoglobulin Changes in Disease: Quantitation on the Basis of Heavy Polypeptide Chains, IgG (γG), IgA (γA), and IgM (γM), and of Light Polypeptide Chains, Type K (I) and Type L (II). Eugene M. McKelvey and John L. Fahey 1778

Metabolic Studies of Human Bone *In Vitro*. I. Normal Bone. Barry Flanagan and George Nichols, Jr. 1788

Metabolic Studies of Human Bone *In Vitro*. II. Changes in Hyperparathyroidism. Barry Flanagan and George Nichols, Jr. 1795

Studies on the Influence of Dietary Cholesterol on Cholesterol Metabolism in the Isotopic Steady State in Man. Jean D. Wilson and Charles A. Lindsey, Jr. 1805

Studies on the Pathogenesis of Steatorrhea in the Blind Loop Syndrome. Robert M. Donaldson, Jr. 1815

Kinetics of Triglyceride Turnover of Very Low Density Lipoproteins of Human Plasma. G. M. Reaven, D. B. Hill, R. C. Gross, and J. W. Farquhar 1826

Studies on the Mechanism of Action of Unsaturated Fats on Cholesterol Metabolism in the Rabbit. Fredrick A. Bieberdorf and Jean D. Wilson 1834

Sterol and Bile Acid Excretion in Man and the Effects of Dietary Fat. Joel Avigan and Daniel Steinberg 1845

Studies on the Mechanism of Natriuresis Accompanying Increased Renal Blood Flow and Its Role in the Renal Response to Extracellular Volume Expansion. Laurence E. Earley and R. M. Friedler 1857

A Circulating Anticoagulant in γ_{1A}-Multiple Myeloma: Its Modification by Penicillin. Helen I. Glueck and Richard Hong 1866

Pulsus Paradoxus. Ralph Shabetai, Noble O. Fowler, John C. Fenton, and Manuel Masangkay 1882

Considerations of the Physiological Variables That Determine the Blood Carboxyhemoglobin Concentration in Man. R. F. Coburn, R. E. Forster, and P. B. Kane 1899

The Relationship of the Renal Vascular Activity of Angiotensin II to the Autonomic Nervous System. John C. McGiff and Thomas M. Fasy 1911

The Effect of Medium Chain Triglyceride upon Fat Absorption and Plasma Lipid and Depot Fat of Children with Cystic Fibrosis of the Pancreas. Peter T. Kuo and Nancy N. Huang ... 1924

NUMBER 12, DECEMBER 1965

Permeability Characteristics of the Human Small Intestine. John S. Fordtran, Floyd C. Rector, Jr., Maynard F. Ewton, Nicholas Soter, and John Kinney 1935
Significance of Bacterial Variants in Urine of Patients with Chronic Bacteriuria. Laura T. Gutman, Marvin Turck, Robert G. Petersdorf, and Ralph J. Wedgwood 1945
Viruria in Dogs after Injection of Coxsackie B-1 Virus into a Renal Artery. Irwin Schultz and C. Larkin Flanagan 1953
The Influence of Age on the Intestinal Absorption of ^{47}Ca in Women and Its Relation to ^{47}Ca Absorption in Postmenopausal Osteoporosis. Louis V. Avioli, Joseph E. McDonald, and Sook Won Lee 1960
The Differentiation of Exogenous and Endogenous Hyperlipemia by Paper Electrophoresis. Robert S. Lees and Donald S. Fredrickson 1968
The Long-Term Stability of Triglyceride Molecules in Adipose Tissue. Enoch Gordis 1978
The Determination of the Rate of Deiodination of Radioactive Thyroxine in Human Subjects. M. Anbar, S. Guttmann, G. Rodan, and J. A. Stein 1986
Partial Purification and Properties of the Isoniazid Transacetylase in Human Liver. Its Relationship to the Acetylation of *p*-Aminosalicylic Acid. John W. Jenne 1992
Actions of Parathyroid Hormone in the Vitamin D-deficient Dog. Robert L. Ney, William Y. W. Au, Gerald Kelly, I. Radde, and Frederic C. Bartter 2003
Abnormalities in Carbohydrate Tolerance Associated with Elevated Plasma Nonesterified Fatty Acids. Don S. Schalch and David M. Kipnis 2010
Studies of Parietal Cell Antibody in Pernicious Anemia. Graham H. Jeffries and Marvin H. Sleisenger 2021
The Biosynthesis of Adrenal Steroids: Effects of Angiotensin II, Adrenocorticotropin, and Potassium. Norman M. Kaplan 2029
Pulmonary Arterial Pressure at High Pulmonary Flow. Noble O. Fowler and John C. Holmes 2040
Effects of Exercise on Myocardial Force-Velocity Relations in Intact Unanesthetized Man: Relative Roles of Changes in Heart Rate, Sympathetic Activity, and Ventricular Dimensions. Edmund H. Sonnenblick, Eugene Braunwald, John F. Williams, Jr., and Gerald Glick 2051
Acknowledgment to Reviewers ..... facing page 1935
Author Index to Volume 44 2063
Subject Index to Volume 44 2086
